re. planning application 3/2020/1085

Dear Mr Machole,

people round here are well aware of the current value of land should the above get planning permission.

It would set a dangerous precedent in an area where other, more environmentally conscious residents are trying hard to maintain a suitable environment for the local birdlife. Its not a good idea to set that precedent for many reasons.

It is not the individual construction project I object to — rather that it is a dangerous precedent.
