

Construction (Design and Management) Regulations 2007
Designer Considerations
Street Design Partnership's duty on this project is that of "Designer" as defined by Regulation 2, and have avoided foreseeable risks to those involved in the construction and future use of the structure and its use during the project. It is not reasonably practicable to avoid all risks, but the design team has provided adequate information about any significant risks associated with the design and co-ordinated the work with others in order to improve the way in which risks are managed and controlled.
The associated data are restricted to site or project specific data and as such are not considered as a complete and final list of all hazards that may exist.
