DESIGN AND ACCESS STATEMENT

IN SUPPORT OF A PLANNING APPLICATION FOR

AN AGRICULTURAL COVERED MUCK MIDDEN

AT

PLANTATION FARM, CHAIGLEY, CLITHEROE, BB7 3LX

Amount

This application is for one building to provide under cover manure storage to be used in conjunction with the applicants existing livestock business from the site.

Use

The proposed building will provide under cover storage for manure produced on the farm. The applicant is applying for this building along with a grant from Natural England under catchment sensitive farming. The manure on site is currently stored outside on the yard area for 3 – 4 months before being spread on the land. By providing a covered area for this manure it ensures that all the nitrates available are retained in the manure which in turn acts as good fertiliser for the pasture land. When undercover the manure is not subject to adverse weather conditions which reduce the nitrate content of the soil and can produce run off of dirty water into the ground water sources. The Ribble Valley has been targeted by Natural England as being a Catchment Sensitive Target area and they are working alongside the environment agency to reduce pollution into the ground water and river sources, therefore for the applicant to comply with these regulations this building is essential.

Layout

The proposed building will be sited adjacent the existing agricultural buildings on site which can be clearly seen on the location map accompanying the planning application. The building will provide storage for the bedding manure produced from the applicant's livestock which will be kept dry until it is needed on the surrounding fields. The proposed building is well within the existing built environment of the existing farm and will not cause any detrimental impact on the surrounding area.

Scale

The scale of the building is in keeping with the amount of manure produced on site and also in keeping with the other buildings on site.

Landscaping

The applicant is proposing to continue on the existing bund to the rear of the building. This bund will be 2.5 m high and created using the spoil dug from the site, it will then be grassed over.

Appearance

The appearance of the building has been designed to reflect a modern agricultural building of this type whilst taking the surrounding buildings into account. The choice of materials will ensure that the roof and side cladding will ensure the building blends into its surroundings whilst being designed for purpose.

Access

Access to the site will remain as existing and there is adequate room for the turning and maneuvering of vehicles and room for emergency vehicles if they were ever required on site
