

RIBBLE VALLEY
BOROUGH COUNCIL

15 JUL 2011

FOR THE
ATTENTION OF

For office use only

Application No: 020110577P

Date received

Fee paid £

Receipt No:

Council Offices, Church Walk, Clitheroe, Lancashire. BB7 2RA Tel: 01200 425111 www.ribblevalley.gov.uk

Application for Planning Permission. Town and Country Planning Act 1990

You can complete and submit this form electronically via the Planning Portal by visiting www.planningportal.gov.uk/apply

Publication of applications on planning authority websites

Please note that the information provided on this application form and in supporting documents may be published on the Authority's website. If you require any further clarification, please contact the Authority's planning department.

Please complete using block capitals and black ink

It is important that you read the accompanying guidance notes as incorrect completion will delay the processing of your application

1. Applicant Name and Address

Title: MR First name: GARY
Last name: CLARK
Company (optional): —
Unit: House number: 138 House suffix:
House name:
Address 1: WHALLEY ROAD
Address 2: WILPSHIRE
Address 3:
Town: BLACKBURN
County: LANCASHIRE
Country: UK
Postcode: BB1 9LJ

2. Agent Name and Address

Title: First name:
Last name:
Company (optional):
Unit: House number: House suffix:
House name:
Address 1:
Address 2:
Address 3:
Town:
County:
Country:
Postcode:

3. Description of the Proposal

Please describe the proposed development, including any change of use:

A FIRST STOREY EXTENSION ABOVE EXISTING GARAGE.
EXTENSION CONTAINS 2 x BEDROOMS (1 = EN-SUITE).

Has the building, work or change of use already started?

☐ Yes

☒ No

If Yes, please state the date when building, work or use were started (DD/MM/YYYY):

(date must be pre-application submission)

Has the building, work or change of use been completed?

☐ Yes

☒ No

If Yes, please state the date when the building, work or change of use was completed: (DD/MM/YYYY):

(date must be pre-application submission)

4. Site Address Details

Please provide the full postal address of the application site

Unit: House number: **138** House suffix:

House name:

Address 1: **WHALLEY RD**

Address 2: **WILPSHIRE**

Address 3:

Town: **BLACKBURN**

County: **LANCS**

Postcode (optional): **BB1 9LJ**

Description of location or a grid reference (must be completed if postcode is not known):

Easting: Northing:

Description:

5. Pre-application Advice

Has assistance or prior advice been sought from the local authority about this application? ☐ Yes ☒ No

If Yes, please complete the following information about the advice you were given (This will help the authority to deal with this application more efficiently)

Please tick if the full contact details are not known, and then complete as much as possible: ☐

Officer name:

Reference:

Date (DD/MM/YYYY):
(must be pre-application submission)

Details of pre-application advice received?

6. Pedestrian and Vehicle Access, Roads and Rights of Way

Is a new or altered vehicle access proposed to or from the public highway? ☐ Yes ☒ No

Is a new or altered pedestrian access proposed to or from the public highway? ☐ Yes ☒ No

Are there any new public roads to be provided within the site? ☐ Yes ☒ No

Are there any new public rights of way to be provided within or adjacent to the site? ☐ Yes ☒ No

Do the proposals require any diversions /extinguishments and/or creation of rights of way? ☐ Yes ☒ No

If you answered Yes to any of the above questions, please show details on your plans/drawings and state the reference of the plan(s)/drawings(s)

7. Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste? ☐ Yes ☒ No

If Yes, please provide details:

Have arrangements been made for the separate storage and collection of recyclable waste? ☐ Yes ☒ No

If Yes, please provide details:

8. Authority Employee / Member

With respect to the Authority, I am: (a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected member

Do any of these statements apply to you? ☐ Yes ☒ No

If Yes, please provide details of the name, relationship and role

9. Materials

If applicable, please state what materials are to be used externally. Include type, colour and name for each material:

	Existing (where applicable)	Proposed	Not applicable	Don't Know
Walls	BRICK - COVERED WITH PEBBLE DASH NATURAL COLOUR	BRICK - RENDERED PLAIN/FLAT COLOUR	☐	☐
Roof	TILE - DARK GREY COLOUR	TILE - DARK GREY COLOUR	☐	☐
Windows	DOUBLE-GLAZE MAHOGANY COLOUR	DOUBLE GLAZE MAHOGANY COLOUR	☐	☐
Doors	n/a	n/a	☒	☐
Boundary treatments (e.g. fences, walls)	n/a	n/a	☒	☐
Vehicle access and hard-standing			☒	☐
Lighting			☒	☐
Others (please specify)			☒	☐

Are you supplying additional information on submitted plan(s)/drawing(s)/design and access statement?

☒ Yes☐ No

If Yes, please state references for the plan(s)/drawing(s)/design and access statement:

10. Vehicle Parking

Please provide information on the existing and proposed number of on-site parking spaces:

Type of Vehicle	Total Existing	Total proposed (including spaces retained)	Difference in spaces
Cars	5	5	0
Light goods vehicles/ public carrier vehicles	-	-	-
Motorcycles	-	-	-
Disability spaces	-	-	-
Cycle spaces	-	-	-
Other (e.g. Bus)	-	-	-
Other (e.g. Bus)	-	-	-

11. Foul Sewage

Please state how foul sewage is to be disposed of:

- ☒ Mains sewer ☐ Cess pit
☐ Septic tank ☐ Other
☐ Package treatment plant

Are you proposing to connect to the existing drainage system? ☐ Yes ☒ No

If Yes, please include the details of the existing system on the application drawings and state references for the plan(s)/drawing(s):

12. Assessment of Flood Risk

Is the site within an area at risk of flooding? (Refer to the Environment Agency's Flood Map showing flood zones 2 and 3 and consult Environment Agency standing advice and your local planning authority requirements for information as necessary)

☐ Yes ☒ No

If Yes, you will need to submit a Flood Risk Assessment to consider the risk to the proposed site

Is your proposal within 20 metres of a watercourse (e.g. river, stream or beck)? ☐ Yes ☒ No

Will the proposal increase the flood risk elsewhere? ☐ Yes ☒ No

How will surface water be disposed of?

- ☐ Sustainable drainage system ☐ Existing watercourse
☒ Soakaway ☐ Pond/lake
☐ Main sewer

13. Biodiversity and Geological Conservation

To assist in answering the following questions refer to the guidance notes for further information on when there is a reasonable likelihood that any important biodiversity or geological conservation features may be present or nearby and whether they are likely to be affected by your proposals

Having referred to the guidance notes, is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

a) Protected and priority species:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

14. Existing Use

Please describe the current use of the site:

PRIVATE HOUSE

Is the site currently vacant? ☐ Yes ☒ No

If Yes, please describe the last use of the site:

When did this use end (if known)?

DD/MM/YYYY

(date where known may be approximate)

Does the proposal involve any of the following?
If yes, you will need to submit an appropriate contamination assessment with your application

Land which is known to be contaminated? ☐ Yes ☒ No

Land where contamination is suspected for all or part of the site? ☐ Yes ☒ No

A proposed use that would be particularly vulnerable to the presence of contamination? ☐ Yes ☒ No

15. Trees and Hedges

Are there trees or hedges on the proposed development site? ☐ Yes ☒ No

And/or: Are there trees or hedges on land adjacent to the proposed development site that could influence the development or might be important as part of the local landscape character? ☐ Yes ☒ No

If Yes to either or both of the above, you may need to provide a full Tree Survey, at the discretion of your local planning authority. If a Tree Survey is required, this and the accompanying plan should be submitted alongside your application. Your local planning authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to construction - Recommendations'.

16. Trade Effluent

Does the proposal involve the need to dispose of trade effluents or waste? ☐ Yes ☒ No

If Yes, please describe the nature, volume and means of disposal of trade effluents or waste

320110577P

17. Residential Units (Including Conversion)Does your proposal include the gain, loss or change of use of residential units?
If Yes, please complete details of the changes in the tables below:☒ Yes☒ No**Proposed Housing**

26. Planning Application Requirements - Checklist

Please read the following checklist to make sure you have sent all the information in support of your proposal. Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the Local Planning Authority has been submitted.

The original and 3 copies of a completed and dated application form:

☐

The correct fee:

☐

The original and 3 copies of the plan which identifies the land to which the application relates drawn to an identified scale and showing the direction of North:

☐

The original and 3 copies of a design and access statement, if required (see help text and guidance notes for details):

☐

The original and 3 copies of other plans and drawings or information necessary to describe the subject of the application:

☐

The original and 3 copies of the completed, dated Ownership Certificate (A, B, C, or D - as applicable):

☐

The original and 3 copies of the completed, dated Article 12 Certificate (Agricultural Holdings):

☐

27. Declaration

I/we hereby apply for planning permission/consent as described in this form and the accompanying plans/drawings and additional information

Signed - Applicant:

Or signed - Agent:

Date (DD/MM/YYYY):

14/7/11

(date cannot be pre-application)

Mr Gary Clarke

Whitefield
138 Whalley Road
Wilpshire
BB1 9LJ

11 August 2011

Job ref: B 1014

Dear Mr Clarke

Re: Protected Species Survey (Bats): 138 Whalley Road, Wilpshire, Lancashire, BB1 9LJ

Introduction

You have requested a protected species survey at the above property as a condition of a planning application to Ribble Valley Borough Council for building alterations / side extension above the existing garage.

The local authority requires an appraisal of the impact of the development on all protected species in accordance with PPS9. Additionally mitigation procedures are required to protect bats and their roosts and to ensure there are *'no adverse effects on the favourable conservation status of a bat population'*

A scoping survey and daylight inspection was undertaken on Tuesday 9 August 2011 between 10.00 and 10.30. The weather at the time of the inspection was mild, dry and bright (max temperature: 15.5°C; cloud cover: 75%; wind: light south-westerly breeze) providing optimal conditions for a daylight scoping survey.

The inspection has found no evidence of bat activity and therefore it is highly unlikely that bats will be disturbed during the proposed building alterations.

Survey methodology

The protected species survey provides a daylight assessment of the property (bats). The aim of a bat inspection is to make an assessment of the potential value of the site for European Protected Species (EPS) and to establish whether bats have ever been active within any part of the property that will be affected by the building operations.

A desk study including a local data search was undertaken to identify significant records of bat activity within 0.5 km of the property

The survey methodology follows the recommended monitoring guidelines published by the Bat Conservation Trust (*BCT – Bat Surveys, Good Practice Guidelines, 2007*), Natural England (*Survey Objectives, Methods and Standards as outlined in the Bat Mitigation Guidelines, 2004*) and Survey and Monitoring Methods, (*Bat Worker's Manual, JNCC, 2004*).

Non-intrusive survey methods were used to assess the use of the property by bats. The search was made using a high-powered lamp (Clu-lite 1,000,000 candle power), close-focussing binoculars (Leica Trinovid), a digital camera (Kodak MD41) and 900mm endoscope (ProVision 300) to view all likely areas of the building for the presence of bats, ie. droppings and urine and grease staining, feeding remains such as discarded moth and butterfly wings and other insects fragments typically found in a feeding and resting area.

Personnel

The survey was carried out by David Fisher (Earthworks Environmental Design) - an experienced ecological consultant with more than 25 years experience of bat ecology and field survey work and a Natural England licence holder since 1990; current NE licence No: 20103384, (Conservation, Science and Education)

Constraints

The inspection was carried out using 'non-intrusive' survey techniques to determine bat activity within the buildings. (reference: *Bat Surveys*, BCT, 2007, p23)

Evening emergence and / or dawn re-entry surveys at the property have not been undertaken

The survey is designed to determine the likely presence of bats within the building and does not necessarily prove absence.

National Biodiversity Network (NBN Gateway) database records, whilst indicative of the bat species that are likely to occur within a 10km square, do not confirm presence or absence of a species or habitat.

Absence of records does not imply that a particular bat species is not present within the recording area.

Data search

A local data search was carried to identify records of bat activity within 0.5km of the site. The following bat species are known to be present throughout the Ribble Valley (source - NBN 10km squares SD73 and SD74):

- | | |
|--------------------------------|---|
| • Natterer's bat | (<i>Myotis nattereri</i>) |
| • Whiskered bat / Brandt's bat | (<i>M. mystacinus</i> / <i>M. brandtii</i>) |
| • Daubenton's bat | (<i>M. daubentonii</i>) |
| • Common long-eared bat | (<i>Plecotus auritus</i>) |
| • Common pipistrelle | (<i>Pipistrellus pipistrellus</i>) |
| • Soprano pipistrelle | (<i>P. pygmaeus</i>) |
| • Noctule bat | (<i>Nyctalus noctula</i>) |

The following websites and datasets were consulted during the preparation of this report:

1. National Biodiversity Network (NBN) database, (terrestrial mammals - chiroptera)
2. Bat Conservation Trust (BCT)
3. North Lancashire Bat Group
4. East Lancashire Bat Group
5. Lancashire Biodiversity Partnership
6. Biological Heritage Sites Partnership (LCC, NE and LWT)
7. EED dataset (Lancashire bat records 2000 - 2011)
8. Magicmap interactive map
9. Natureonthemap (Natural England)
10. Multimap
11. Google Maps
12. MARIO - Maps and related information online (Lancashire County Council).

There are no records of roosting bats at this property or at neighbouring properties within 250m.

There are no records of significant maternity roosts or winter hibernacula within 0.5km of the property

Description of the property

The property (built circa 1928) is a detached two storey house with brick cavity wall construction. The square hip roof has a traditional timber frame construction; the rafter-with-purlin roof is clad in tiles and lined with a hessian and bitumen roofing felt (figures 5 and 6).

The roof void is insulated with a glass fibre material laid over the ceiling joists and the void is partly boarded for access; this area is clean, dry and well-ventilated and there is no evidence of bat droppings or other indicative signs of access by bats.

All external features of the property including rendered walls, roof verges, ridge tiles, lead work flashing and D/G windows / doors are very well-maintained and fully secure.

A single storey garage is attached to the east side of the property (figures 1 and 4); the garage has a flat bitumastic roof with triangular parapet walls to the front and rear. The garage has glazed D/G window units, the area is well-sealed and all fascias and soffits are secure. At the rear of the garage is a small single storey 'lean-to' utility area with mono-pitch roof (figure 3); this area is also secure and there is no evidence of access by bats.

Proposed development

It is understood the proposed building work includes a two storey side extension requiring removal of the existing garage roof.

Existing property (images)

Figure 1:

Figure 2:

Figure 3:

Figure 4:

Figure 5:

Figure 6:

Location of the property

NGR: SD 695330. Elevation: 145m.

The property is located close to Whalley Road at the extreme eastern edge of the urban development in Wilpshire and is also adjacent to open countryside to the south of the site. The house is part of a linear residential development and is close to other properties of similar age design and construction.

The land at the rear (south) of the property is permanent grassland and extensive grazing rising to 235m at Wilpshire Moor and Parsonage Reservoir. There are no significant areas of open standing water or water channels within 500m of the site and there are no areas of significant broadleaved woodland or conifer plantation nearby. The nearest woodland is approximately 450m east of the property at Carr Hall.

There are no designated nature conservation sites immediately adjacent to the property – ie. Sites of Special Scientific Interest (SSSI), Biological Heritage Sites (BHS), National Nature Reserves (NNR's), Local Nature Reserves (LNR's) or Regionally Important Geological and Geo-morphological Sites (RIGS).

Survey results

There is no evidence of bat activity at this property and it is unlikely that bats have ever been present.

All external features of the building including walls, roof surfaces, fascia soffits, ridge tiles and roof verges were inspected for evidence of roosting activity; there are no signs of bat droppings, discarded feeding remains or other indicative signs of access normally associated with bat roosting activity.

Evaluation of results

- The conservation significance of property is currently very low / negligible.
- All external features of the building are well-sealed and secure, consequently the potential of this property to support roosting, resting or perching bats is significantly reduced.
- The potential of the existing building to support a maternity roost, hibernation roost or transitory / mating roost is low/ negligible.
- The surrounding land / habitat provides sub-optimal feeding, foraging and commuting habitat for bats; the site is not adjacent to high-value feeding and foraging habitat and there are no extensive areas of broadleaved woodland, plantation, riparian habitat, open water or river channel adjacent to the site.

Summary and recommendations

The scale of impact of the development at site level on local bat populations is likely to be negligible or low.

The proposed building alterations are **unlikely to cause disturbance to bats** or result in the loss of a bat roost or cause injury or death of a European Protected Species – (Bats) or result in any significant impact on a local bat population.

In the unlikely event of bats being exposed or vulnerable to harm during the proposed works you should follow the mitigation procedures outlined below and seek further advice.

Further survey effort at this site is not recommended.

The scale of impact of the proposed development at site level on local bat populations is negligible or low.

Mitigation refers to the practices adopted to reduce or remove the risk of disturbance, injury or death of a protected species or damage to a roost. The Bat Mitigation Guidelines define mitigation as "*measures to protect the bat population from damaging activities and reduce or remove the impact of development*".

MITIGATION NOTES:	
ACTION:	METHOD:
1 Timing constraints	None
2 Removal of roofing materials	All parts of the existing property are considered to be low risk. However, there remains a very low risk of accidentally exposing roosting bats at this property; you should be aware that isolated bats are 'occasionally' found roosting beneath roofing materials, fascias and soffits most frequently between May and November
3 Accidental exposure of bats	In the unlikely event of bats being exposed or vulnerable to harm, all work in that area must stop immediately. Cover the exposed bats to reduce further risk of harm and seek further advice by calling the Bat Conservation Trust (BCT) helpline on 0845 1300 228 Stop work immediately if bats are exposed or likely to be disturbed All contractors should be aware of their responsibilities to protected species. If accumulations of droppings are found during the removal of the roofing materials, stop work and seek advice before continuing work in this area
4 Avoid handling bats	Contractors should avoid handling bats but where there is no alternative, use gloves or a small container to move them to a dark and quiet area, preferably without causing them to fly in daylight
5 Legal protection	Site contractors and project managers should be fully aware of the legal protection afforded all species of bat in the UK and procedures should be in place to mitigate for the potential impact on bats - see notes on 'Bats and the Law' in this report
6 Further advice	If you require further advice on bats during the proposed building operations or if you find an injured or resting bat, call BCT immediately; they will normally contact a qualified bat worker in the local area who will visit the site and provide further advice free of charge
7 Post-development monitoring	None, no further survey effort is required

Please note: I do not provide a copy of this report to the local planning authority, therefore it is your responsibility to forward the report to Ribble Valley Borough Council

Yours sincerely

David Fisher

All bat species in the UK receive full protection under the Wildlife and Countryside Act 1981 (amended by the Environment Protection Act 1990). The Countryside and Rights of Way Act 2000 amends the Wildlife and Countryside Act to also make it an offence to intentionally or recklessly damage, destroy or obstruct a place that bats use for shelter or protection. All species of bats are listed on Schedule 5 of the 1981 Act, which makes it an offence to:

- *intentionally kill, injure or take any wild bat.*
- *intentionally or recklessly damage, destroy or obstruct access to any place that a wild bat uses for shelter or protection. This is taken to mean all bat roosts whether bats are present or not.*
- *intentionally or recklessly disturb any wild bat while it is occupying a structure or place which it uses for shelter or protection.*

Protected species (Bats) and the planning process¹

For development proposals requiring planning permission, the presence of bats, and therefore the need for a bat survey, is an important 'material planning consideration'. Adequate surveys are therefore required to establish the presence or absence of bats, to enable a prediction of the likely impact of the proposed development on them and their breeding sites or resting places and, if necessary, to design mitigation and compensation. Similarly, adequate survey information must accompany an application for a Habitats Regulations licence (also known as a Mitigation Licence) required to ensure that a proposed development is able to proceed lawfully.

The term 'development' [used in these guidelines] includes all activities requiring consent under relevant planning legislation and / or demolition operations requiring building control approval under the Building Act 1984.

Natural England (Formerly English Nature) states that development in relation to bats "*covers a wide range of operations that have the potential to impact negatively on bats and bat populations. Typical examples would be the construction, modification, restoration or conversion of buildings and structures, as well as infrastructure, landfill or mineral extraction projects and demolition operations*".
