DESIGN AND ACCESS STATEMENT

320110927P

SITE: HAY MOO, ELSWICK FARM, MELLOR BROW

PROPOSAL: REPLACEMENT DWELLING TOGETHER WITH CHANGE OF USE OF
AGRICULTURAL LAND TO FORM EXTENDED CURTILAGE

1 ASSESSMENT

- 1.1 Elswick Farm is situated on the western side of Mellor Brow. The farm comprises the original farmhouse and garden, now in separate ownership, the property the subject of this application, a modern dwelling with an agricultural occupancy condition attached, a traditional stone barn converted for use as self-catering holiday accommodation (planning reference 3/2004/0450), two of which have recently been granted consent for use as dwellings under reference 3/2011/0544 and a further dwelling granted consent under reference 3/2011/0163.
- 1.2 Access to the farm is obtained via a track which runs up the west side of 46 Mellor Brow, an end terrace property. The access track coincides with the settlement boundary, which includes the terrace and properties to the east of the farm, but excludes the farm itself and properties to the west and south. Accordingly the application site is located within the open countryside. Extending west along Mellor Brow there is considerable ribbon development, which impacts on the character of the area.
- 1.3 Policies in the development plan are informed by government advice detailed in Planning Policy Guidance (PPG's) and Planning Policy Statements (PPS's), and the development plan includes those policies that have been saved from the Ribble Valley Districtwide Local Plan. Policies of particular relevance in this instance are G1

which details a number of development control criteria that may be applicable in the determination of planning applications, G5 which details the nature of development that is applicable in the open countryside, ENV3 which protects the countryside from inappropriate development. H14 which relates to the replacement and rebuilding of dwellings in the open countryside.

2 INVOLVEMENT

- 2.1 Pre-application advice has been sought from Colin Sharpe a Senior Planning Officer at the Council who has indicated that the principle of the redevelopment of the site for a replacement property is in full accord with policy.

3 EVALUATION

- 3.1 The buildings subject to this application are within a group of buildings forming the original farmstead of Elswick Farm. As a matter of planning policy, the buildings are outside the defined village envelope of Mellor Brow and are technically in open countryside. However, as a matter of fact, the buildings and the farmstead are contiguous with the built-up part of Mellor Brow and benefit from the same facilities as the rest of the village. These include mains water, electricity and sewerage and good access to the road network, local bus services and other local facilities. The proposed development is in a sustainable location and would put no additional pressure on services such as refuse collection, emergency services or postal services.
- 3.2 The house itself has the benefit of an extant planning permission (3/2010/0416) for a substantial extension to form a much larger dwelling. This extension once implemented would more than double the size of the original dwelling. Detailed costings have been obtained for the implementation of the approved scheme which in itself would involve a substantial reworking of the existing retained property and it has been established that it would be far more cost effective to rebuild the property in total rather than undertake the expansive extension and renovation works.

4 DESIGN

- 4.1 The extant consent if implemented would result in a building which incorporates less sensitive detailing than that shown in the slightly smaller proposal incorporated within this revised design. Much of the non-original detailing have been removed from this latest design which results in a building of more traditional detailing.
- 4.2 The main footprint of the house will measure 14m x 12.5m under a pitched roof design with accommodation within the roofspace. The proposed materials are natural stone and blue slate with all doors and windows being of timber finish.
- 4.3 The intention is to slightly re-site the replacement dwelling reward of the present dwelling in order to improve the separation distance between the new house and the existing converted shippon.

5 ACCESS

- 5.1 This group of buildings are in a sustainable location with access to a variety of local facilities and services. No changes to the access into the site as a whole are proposed with improvements having previously been implemented as an integral part of the scheme for converting the adjoining building to form four holiday cottages. Parking provision will be made for two vehicles. Adequate facilities exist to enable vehicles to turn around ensuring that vehicles can enter and leave the site from Mellor Brow in forward gear. Traffic likely to be generated from the one dwelling proposed would be no greater than the traffic likely to be generated for the scheme for the adaptation and extension of the existing dwelling as already granted planning permission. Vehicle volumes and speeds within the wider group of buildings are low, therefore shared pedestrian/vehicle access facilities are appropriate. Level access can be provided into the dwelling.
