12. Foul Sewage

Please state how foul sewage is to be disposed of:

- ☐ Mains sewer ☒ Cess pit
☐ Septic tank ☐ Other
☐ Package treatment plant

Are you proposing to connect to the existing drainage system? ☐ Yes ☒ No

If Yes, please include the details of the existing system on the application drawings and state references for the plan(s)/drawing(s):

14. Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

a) Protected and priority species:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

16. Trees and Hedges

Are there trees or hedges on the proposed development site? ☐ Yes ☒ No

And/or: Are there trees or hedges on land adjacent to the proposed development site that could influence the development or might be important as part of the local landscape character? ☐ Yes ☒ No

If Yes to either or both of the above, you will need to provide a full Tree Survey, with accompanying plan before your application can be determined. Your Local Planning Authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to construction - Recommendations'.

13. Assessment of Flood Risk

Is the site within an area at risk of flooding? (Refer to the Environment Agency's Flood Map showing flood zones 2 and 3 and consult Environment Agency standing advice and your local planning authority requirements for information as necessary)

☐ Yes ☒ No

If Yes, you will need to submit a Flood Risk Assessment to consider the risk to the proposed site.

Is your proposal within 20 metres of a watercourse (e.g. river, stream or beck)? ☐ Yes ☒ No

Will the proposal increase the flood risk elsewhere? ☐ Yes ☒ No

How will surface water be disposed of?

- ☐ Sustainable drainage system ☒ Existing watercourse
☒ Soakaway ☐ Pond/lake
☐ Main sewer

15. Existing Use

Please describe the current use of the site:

AGRICULTURAL

Is the site currently vacant? ☐ Yes ☒ No

If Yes, please describe the last use of the site:

When did this use end (if known)?
DD/MM/YYYY
(date where known may be approximate)

Does the proposal involve any of the following:

Land which is known to be contaminated? ☐ Yes ☒ No

Land where contamination is suspected for all or part of the site? ☐ Yes ☒ No

A proposed use that would be particularly vulnerable to the presence of contamination? ☐ Yes ☒ No

If you have answered Yes to any of the above, you will need to submit an appropriate contamination assessment

17. Trade Effluent

Does the proposal involve the need to dispose of trade effluents or waste? ☐ Yes ☒ No

If Yes, please describe the nature, volume and means of disposal of trade effluents or waste

18. Residential Units (Including Conversion)

Does your proposal include the gain, loss or change of use of residential units?

☐ Yes☒ No

If Yes, please complete details of the changes in the tables below:

Design and Access Statement

*For, Lyme House Farm, Thornley with Wheatley
Applicant E Roper and Sons*

To create new livestock housing for milk cows adjacent to the existing silage clamp and milking parlour.

The light and airy building will also provide good clean accommodation for the housing of the larger cows now comprising the dairy herd self-contained with feed barrier, water troughs and modern cubicle beds.

Design

The new building is to be of the same construction and materials as the existing buildings on the site. The orientation is parallel to the existing buildings.

The building will provide a modern system for part of the existing dairy herd under a portal framed building.

The materials to be used are a steel frame, fibre cement roof (with clear plastic rooflights), steel gates, feed barrier, reinforced concrete panelled walls above which with timber space boarding to the rear and gable ends.

Transport & Access

Access to the site is from the public highway uses the existing entrance and drive. The existing entrance is onto a straight section of road with good sightlines. This application does not seek to alter the existing entrance or usage of it.

Access around the Building

Access to and around the building is to be from the existing farm yard area to the south side. The livestock building for dairy cows will service the existing farm buildings.

Appearance

The materials are going to be similar to the completed modern buildings in the existing farmstead.

Appraising the Context

The building of the dairy cow housing will improve the welfare, management and feeding of the existing dairy cow herd.

For, Lyme House Farm, Thornley with Wheatley, Longridge
Applicants E Roper & Sons

Agricultural justification

Proposal to erect an Agricultural Livestock building for housing and feeding part of the existing dairy cow herd. This will be to the north west side of the existing livestock buildings and stoned access track. The existing cow cubicles are dated and unsuitable for some of the larger cows as modern breeding has led to an overall increase in animal size.

The current system of self-feed at the silage clamp face and use of ring feeders are both very much outdated as commenced in 1972. The current potential for feed contamination and cows bullying must be reduced. The separate and purpose built double pitched building will provide a clean dry and sufficiently well ventilated space away from other age-groups of cattle. This is recommended by the applicant's milk buyer, vet, farm consultant and identified in the farm's animal health plan strategy.

The roof will have a cantilever section over the feed troughs to prevent wastage of feed which would otherwise be exposed to the elements. The building will have clean bedded modern large size cubicles and constant access to feed.

The proposed building will house a batch of in-milk cows separately and the adjacent building can then be available for dry cows and in calf heifers separately. There is a need to house cows of different yield output and stages of lactation for a period of several months particularly during the winter in addition to the bulling and calving periods.

When the new building is completed a program of alteration and modernisation of the existing buildings will take place over a planned period to house some dry cows and heifers with a more suitable feed trough arrangement. The old indoor silage clamp will be continue to be used to a safe capacity and also with bought in feeds such as grains and straights stored clean and dry through the winter months. Outdoor feeding yards and feed storage areas will be phased out due to the rainwater factor in slurry and dirty water storage under the extended NVZ regulations. The original existing building will continue to be fully utilised but in a more efficient and welfare friendly manner.

The applicants have always had a policy of rearing all heifer replacements and calves on their own farm. The dairy cow building project will achieve a dramatic improvement to the existing adult animal health. It would not seem unreasonable to make a significant investment in new and refurbished cow housing for modernisation, health and welfare reasons after a thirty year period.

Current herd, replacements and beef

Milk cows including dry cows 200 cubicle housed
In calf heifers 50 cubicle housed
Bulling heifers 50
Calves mixed 30 (variable to time of year)

Land

Owned 350 acres grass and short term leys
Rented grass and short term leys
0 acres long term agreement
0 acres short term grazing
Total grass 350 acres
Arable cropped/rented
0 acres maize
0 acres winter wheat
Total arable 0 acres
