Application for Planning Permission. Town and Country Planning Act 1990

You can complete and submit this form electronically via the Planning Portal by visiting www.planningportal.gov.uk/apply

Publication of applications on planning authority websites

Please note that the information provided on this application form and in supporting documents may be published on the Authority's website. If you require any further clarification, please contact the Authority's planning department

Please complete using block capitals and black ink

It is important that you read the accompanying guidance notes as incorrect completion will delay the processing of your application

1. Applicant Name and Address

Title: MR First name: JOHN
Last name: SWIFT
Company (optional):
Unit: House number: House suffix:
House name: PARK HEN
Address 1: STONEY GATE LANE
Address 2: DIBCHESKAR
Address 3:
Town: PRESTON
County: LANCASHIRE
Country: UK
Postcode: PR3 2ZS

2. Agent Name and Address

Title: MR First name: KARL
Last name: ZALDARIS
Company (optional):
Unit: House number: House suffix:
House name: HATHERSAGE BARN
Address 1: MOORSIDE LANE
Address 2: WOOLCUMPTON
Address 3:
Town: PRESTON
County: LANCASHIRE
Country: UK
Postcode: PR4 0TB

3. Description of the Proposal

Please describe the proposed development, including any change of use:

CONVERSION OF 4 STANLEY STREET INTO TWO SELF
CONTAINED FLATS INCLUDING EXTENSIONS, PLUS
CREATION OF NEW DWELLING TO REAR OF 4 STANLEY
STREET

Has the building, work or change of use already started?

☐ Yes

☒ No

If Yes, please state the date when building,
work or use were started (DD/MM/YYYY):

(date must be pre-application submission)

Has the building, work or change of use been completed?

☐ Yes

☒ No

If Yes, please state the date when the building, work
or change of use was completed: (DD/MM/YYYY):

(date must be pre-application submission)

320120153P

4. Site Address Details

Please provide the full postal address of the application site

Unit: House number: **4** House suffix: House name: Address 1: **STANLEY STREET**Address 2: **LONGRIDGE**Address 3: Town: **PRESTON**County: **LANCASHIRE**Postcode (optional): **PR3 3NT**

Description of location or a grid reference (must be completed if postcode is not known):

Easting: Northing:

Description:

**END TERRACED HOUSE +
PERFECT BARN TO REAR YARD****5. Pre-application Advice**Has assistance or prior advice been sought from the local authority about this application? ☒ Yes ☐ No

If Yes, please complete the following information about the advice you were given (This will help the authority to deal with this application more efficiently)

Please tick if the full contact details are not known, and then complete as much as possible: ☐

Officer name:

GIRAEUE THORPE

Reference:

RN/2011/ENQ/00262Date (DD/MM/YYYY): **47/06/2011**
(must be pre-application submission)

Details of pre-application advice received?

**SEE ATTACHED EMAIL
FROM GIRAEUE THORPE
DATED 05/08/2011****6. Pedestrian and Vehicle Access, Roads and Rights of Way**Is a new or altered vehicle access proposed to or from the public highway? ☐ Yes ☒ NoIs a new or altered pedestrian access proposed to or from the public highway? ☐ Yes ☒ NoAre there any new public roads to be provided within the site? ☐ Yes ☒ NoAre there any new public rights of way to be provided within or adjacent to the site? ☐ Yes ☒ NoDo the proposals require any diversions /extinguishments and/or creation of rights of way? ☐ Yes ☒ No

If you answered Yes to any of the above questions, please show details on your plans/drawings and state the reference of the plan (s)/drawings(s)

7. Waste Storage and CollectionDo the plans incorporate areas to store and aid the collection of waste? ☒ Yes ☐ No

If Yes, please provide details:

SHARED REAR YARDHave arrangements been made for the separate storage and collection of recyclable waste? ☒ Yes ☐ No

If Yes, please provide details:

**LOCAL AUTHORITY REFUSE
COLLECTION INCLUDING
RECYCLING****8. Authority Employee / Member**With respect to the Authority, I am: (a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected memberDo any of these statements apply to you? ☐ Yes ☒ No

If Yes, please provide details of the name, relationship and role

9. Materials

If applicable, please state what materials are to be used externally. Include type, colour and name for each material:

	Existing (where applicable)	Proposed	Not applicable	Don't Know
Walls	STONE + BRICK	RENDER	☐	☐
Roof	SLATE	SLATE	☐	☐
Windows	TIMBER TO FRONT UPVC TO REAR	UPVC	☐	☐
Doors	AS WINDOWS	UPVC	☐	☐
Boundary treatments (e.g. fences, walls)	STONE WALLS	STONE WALLS	☐	☐
Vehicle access and hard-standing	STREET PARKING	STREET PARKING	☐	☐
Lighting			☐	☒
Others (please specify)			☐	☐

Are you supplying additional information on submitted plan(s)/drawing(s)/design and access statement?

☒ Yes

☐ No

If Yes, please state references for the plan(s)/drawing(s)/design and access statement:

109/20A - EXTG PLANS + ELEVATIONS

109/21B - PROPOSED PLANS + ELEVATIONS
SITE SURVEY -

D/A STATEMENT
WITH HERITAGE
STATEMENT

10. Vehicle Parking

Please provide information on the existing and proposed number of on-site parking spaces:

Type of Vehicle	Total Existing	Total proposed (including spaces retained)	Difference in spaces
Cars			
Light goods vehicles/ public carrier vehicles			
Motorcycles			
Disability spaces			
Cycle spaces			
Other (e.g. Bus)			
Other (e.g. Bus)			

** ALL ON STREET **

11. Foul Sewage

Please state how foul sewage is to be disposed of:

- ☒ Mains sewer ☐ Cess pit
☐ Septic tank ☐ Other
☐ Package treatment plant

Are you proposing to connect to the existing drainage system? ☒ Yes ☐ No

If Yes, please include the details of the existing system on the application drawings and state references for the plan(s)/drawing(s):

ASSUMED CONNECTION IN REAR YARD

12. Assessment of Flood Risk

Is the site within an area at risk of flooding? (Refer to the Environment Agency's Flood Map showing flood zones 2 and 3 and consult Environment Agency standing advice and your local planning authority requirements for information as necessary)

☐ Yes ☒ No

If Yes, you will need to submit a Flood Risk Assessment to consider the risk to the proposed site

Is your proposal within 20 metres of a watercourse (e.g. river, stream or beck)? ☐ Yes ☒ No

Will the proposal increase the flood risk elsewhere? ☐ Yes ☒ No

How will surface water be disposed of?

- ☐ Sustainable drainage system ☐ Existing watercourse
☐ Soakaway ☐ Pond/lake
☒ Main sewer

13. Biodiversity and Geological Conservation

To assist in answering the following questions refer to the guidance notes for further information on when there is a reasonable likelihood that any important biodiversity or geological conservation features may be present or nearby and whether they are likely to be affected by your proposals

Having referred to the guidance notes, is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

a) Protected and priority species:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance:

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

14. Existing Use

Please describe the current use of the site:

EXTA TERRACED HOUSE + PERFECT BARN TO REAR

Is the site currently vacant? ☒ Yes ☐ No

If Yes, please describe the last use of the site:

DWELLING

When did this use end (if known)?

DD/MM/YYYY

(date where known may be approximate)

2005

Does the proposal involve any of the following?

If yes, you will need to submit an appropriate contamination assessment with your application

Land which is known to be contaminated? ☐ Yes ☒ No

Land where contamination is suspected for all or part of the site? ☐ Yes ☒ No

A proposed use that would be particularly vulnerable to the presence of contamination? ☐ Yes ☒ No

15. Trees and Hedges

Are there trees or hedges on the proposed development site? ☐ Yes ☒ No

And/or: Are there trees or hedges on land adjacent to the proposed development site that could influence the development or might be important as part of the local landscape character? ☐ Yes ☒ No

If Yes to either or both of the above, you may need to provide a full Tree Survey, at the discretion of your local planning authority. If a Tree Survey is required, this and the accompanying plan should be submitted alongside your application. Your local planning authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to construction - Recommendations'.

16. Trade Effluent

Does the proposal involve the need to dispose of trade effluents or waste? ☐ Yes ☒ No

If Yes, please describe the nature, volume and means of disposal of trade effluents or waste

17. Residential Units (Including Conversion)

Does your proposal include the gain, loss or change of use of residential units?
If Yes, please complete details of the changes in the tables below:

19. Employment

Please complete the following information regarding employees:

	Full-time	Part-time	Total full-time equivalent
Existing employees			
Proposed employees			

20. Hours of Opening

Please state the hours of opening for each non-residential use proposed:

Use	Monday to Friday	Saturday	Sunday and Bank Holidays	Not known

21. Site Area

Please state the site area in hectares (ha)

22. Industrial or Commercial Processes and Machinery

Please describe the activities and processes which would be carried out on the site and the end products including plant, ventilation or air conditioning. Please include the type of machinery which may be installed on site:

Is the proposal a waste management development? ☐ Yes ☒ No

If the answer is Yes, please complete the following table:

	Not applicable	The total capacity of the void in cubic metres, including engineering surcharge and making no allowance for cover or restoration material (or tonnes if solid waste or litres if liquid waste)	Maximum annual operational throughput in tonnes (or litres if liquid waste)
Inert landfill	☐		
Non-hazardous landfill	☐		
Hazardous landfill	☐		
Energy from waste incineration	☐		
Other incineration	☐		
Landfill gas generation plant	☐		
Pyrolysis/gasification	☐		
Metal recycling site	☐

26. Planning Application Requirements - Checklist

Please read the following checklist to make sure you have sent all the information in support of your proposal. Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the Local Planning Authority has been submitted.

The original and 3 copies of a completed and dated application form:

The correct fee:

The original and 3 copies of the plan which identifies the land to which the application relates drawn to an identified scale and showing the direction of North:

The original and 3 copies of a design and access statement, if required (see help text and guidance notes for details):

The original and 3 copies of other plans and drawings or information necessary to describe the subject of the application:

The original and 3 copies of the completed, dated Ownership Certificate (A, B, C, or D - as applicable):

The original and 3 copies of the completed, dated Article 12 Certificate (Agricultural Holdings):

27. Declaration

February 2012

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge. Into 2no self contained flats with extension along with a new dwelling to rear

1 BACKGROUND + NEED

- 1.1 The applicants own properties along Berry Lane, and own and run Swifts Ironmongers, and have had a commercial presence in the village for generations.
- 1.2 The application site relates to the end terrace house (no 4) on the north west side of Stanley Street, and is sandwiched between the Business Centre on Berry Lane, and the old Mill building at the end of Stanley Street, both of which are owned by the applicant.
- 1.3 The applicant also owns no 1 Sharples Court, as well as the buildings that include the archway that allows access into Sharples Court from Berry Lane.
- 1.4 At present, no 4 Stanley Street is vacant, but was used as a dwelling up until recently.
- 1.5 There is a rear yard which is accessed via a ginnel between no 4 and no 5 Stanley Street and which is shared with the Business Centre.
- 1.6 To the north west corner of the yard are the remains of the ruins of what was once a two storey stone barn, which was reduced in height for safety grounds in recent years.
- 1.7 Recently the applicants have converted the shop units along Berry Lane into a business centre to meet with the commercial needs at the time, and it was their intention to include no 4 into this development. Unfortunately due to the current economic climate, the most financially viable option is to maximise the remaining site for residential use which will also meet with the Local Authorities current housing needs.
- 1.8 The proposals as submitted include for the conversion of no 4 into 2no self contained flats, one flat being on the ground floor and the other flat being on the first floor. To maximise the spacial aspects of the scheme, and enable a more attractive scheme, we have included a single storey extension to create a bedroom to the ground floor flat, and a two storey extension to house the staircase which will serve the first floor flat.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge, into 2no self contained flats with extension along with a new dwelling to rear

1 BACKGROUND + NEED (Cont.)

- 1.9 Last year, we submitted a "Request for Pre-Application Advice" to the Planning Department at Ribble Valley Borough Council to establish in principal, the Authorities response to such a development. A copy of their 'Favourable' response dated 5 August 2010 is attached as part of the application.

2 ASSESSMENT + IMPACT

- 2.1 As the properties exist within an established area within the centre of the village, and is within a mixed use area (residential and commercial) it is assumed that an application for residential use would be appropriate and looked upon favourably by the Local Authority.
- 2.2 The properties to the south east side of Stanley Street are all used as dwellings, and the properties along the north west side are apart of the Business Centre and shops, on street parking is viable and established. Other additional on-street parking exists on all streets around the site.
- 2.3 The applicant has legal access over the land of Sharples Court to access no 1 Sharples Court and the rear of no 77 Berry Lane, both of which are in their current ownership.
- 2.4 As a consequence of the above item. Access to the proposed new build dwelling is made from Stanley Street via the ginnel between no 4 +no 5 Stanley Street.
- 2.5 The properties adjacent to no 4 Stanley Street are commercial properties, and as such it is reasonable to assume that the close proximity of the development will not be an issue in terms of over looking and the like.
- 2.6 The proposed extensions serving no 4 Stanley Street will have Velux Roof lights and as such will not incur any over looking issues, and the scale and positions of these extensions will have little or no impact on adjacent properties.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge. into 2no self contained flats with extension along with a new dwelling to rear

2 ASSESSMENT + IMPACT (Cont.)

- 2.7 The proposed new build dwelling is in effect, a replacement to the ruined barn, albeit slightly larger in foot print, and is to match in profile, to the adjacent brick barn, which are low (approx 4.2m eaves and approx 5.7m ridge heights) two storey extensions relative to the higher main terraced properties that flank the site on all sides.
- 2.8 The first floor rooms to the new build dwelling are to have low internal eaves (approx 1600mm high), and have incorporated combined Velux lights with the majority of the glass being roof mounted with a minor section of glazing being vertical. The size of these are small in comparison to traditional terraced house, and feel that these do not cause any over looking issues.
- 2.9 Longridge is an established village and part of the charm of any village is the 'intimate' settings and spaces between and around buildings, and people wishing to purchase and live in villages expect, enjoy and respect this intimacy, and feel that it is important to continue this aspect within any development in villages, rather than creating 'compromises' within a constrained environment, or leaving potential sites to remain undeveloped.
- 2.10 The proposals are low key and utilise traditional materials and methods of construction, which are appropriate and indigenous to the existing buildings and environment in which they are sited.
- 2.11 The depth of the proposed houses will not interfere with the required 13m + 20% (16m) diameter tree protection zone as requested by the Local Authorities Countryside Officer, to protect the existing mature trees within the park near to the rear boundaries.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge into 2 no self contained flats with extension along with a new dwelling to rear

2 ASSESSMENT + IMPACT (Cont.)

- 2.12 The design/appearance of the proposals will be traditional and low key. Although the area is designated as a "Conservation Area", the area in which the development is proposed is within the rear yard areas of surrounding adjacent properties, most of which which have been extended to create a ad-hoc 'mish-mash' from various eras and to satisfy various commercial and residential uses, and as such the development as proposed has little impact on the frontage face of what is generally seen as the conservation area, and the proposals will help tidy up the rear areas and enhance Sharples Court.

3 DESIGN

- 3.1 The conversion of no 4 Stanley Street will involve internal alterations and improvements which will be dealt with under a Building Regulations Application.
- 3.2 No alterations to the front elevation of no 4 Stanley Street are required, apart for the replacement of existing windows, doors and rainwater goods.
- 3.3 As mentioned previously, to maximise the space in creating 2 self contained flats, it is necessary to build a single storey bedroom extension to the ground floor flat and a two storey extension to house the staircase serving the first floor flat. Both these extensions are low key and utilise indigenous materials (rendered walls and slate roofs).
- 3.4 The proposed new build dwelling, like the extensions, are low key and utilise indigenous materials (rendered walls and slate roofs).
- 3.5 Part of the existing boundary wall to the rear alley way serving the properties on Warwick Street is to be demolished and rebuilt t form the walls to the proposed extensions and new dwelling and is to be constructed in reused stonework, and connected to the existing house wall of no 1 Sharples Court.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge, into 2no self contained flats with extension along with a new dwelling to rear

3 DESIGN (Cont.)

- 3.6 At present there is a raised planting bed which runs long Sharples Court side of the boundary wall where the new build dwelling is to be formed. As part of the proposals, this is to re-formed using stone work dwarf walls capped with stone copings with a metal railing on top. This will provide a visual amenity to Sharples Court by reintroducing planting/greenery into the courtyard and will provide a traditional detail.
- 3.7 The construction of the new elements will be of traditional construction, using traditional materials.
- 3.8 Due to the limited available space, it is envisaged that materials will be transported through the ginnel and through no 4 Stanley Street, with minimal contractor access through Sharples Court.
- 3.9 All works in converting, extending and constructing will be subject to a Building Regulations Application, and it is envisaged that all the work will be carried out at the same time.

4 ACCESS

- 4.1 The site is within the centre of Longridge Town, is apart of the immediate community
- 4.2 Parking and other related issues have been dealt with in previously mentioned items.
- 4.3 Public Transport is available within 100m of the site
- 4.4 "Access for All" will be addressed through Building Regulations Applications if and when the development commences, which will enable easy access onto the site and "into" and "out of" the buildings.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge, into 2no self contained flats with extension along with a new dwelling to rear

4 ACCESS (Cont.)

- 4.5 Access to the proposed new dwelling and the first floor flat will be via the ginnel between no 4 and no 5 Stanley Street, which is shared with the users of the Business Centre. It is envisaged that restricted access through this ginnel will be available by installing coded door entry systems.

5 HERITAGE STATEMENT

- 5.1 The Longridge Conservation Area map indicates that the site to be developed is within the Conservation Area.
- 5.2 The buildings of Stanley Street (except the Mill Building at the end of the Stanley Street) are designated as 'Buildings of Townscape Merit'.
- 5.3 The buildings fronting Berry Lane and Warwick Street (except the Mill Building as mentioned above) are also designated as 'Buildings of Townscape Merit'.
- 5.4 The terraced houses that are located within Sharples Court are **'not'** designated as 'Buildings of Townscape Merit'. As such, it is reasonable to assume that any proposed development within these rear areas has little influence to the impact of the Conservation Area.
- 5.5 The Authorities document "Longridge Conservation Area Management Guidance" makes no specific reference to the areas to which the application relates, or its immediate environs.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge. into 2no self contained flats with extension along with a new dwelling to rear

5 HERITAGE STATEMENT (Cont.)

- 5.6 The Authorities document "Longridge Conservation Area Management Guidance" requires under the title 'New Development' (pages 14-16), the proposed development is to be traditional in form, materials and construction, reflecting and 'mimicking' similar houses adjacent and near by within the conservation area, and respects the adjacent buildings of merit. As mentioned elsewhere, the proposals address and adhere to this requirement.
- 5.7 It should be noted that some adjacent terraced properties, have had the benefit of repairs and improvements, including re-roofing, replacement windows, rear extensions and the like. This selection/collection of extensions, all of which have been constructed at various stages and periods of the buildings life times, has added character and charm to the area, and being built at the rear of the properties, are only seen by limited people who have access to the rear of the properties. It is likely that the some of these repairs/improvements have been carried out with out the benefit of planning permission.
- 5.8 Such ad-hoc building works should be seen as a positive response to the continuation and sustainability of the buildings use, their history and Heritage. The works as proposed are in response to the social and economic climates in which we are faced, and the scale and simple designs as submitted reflect the current phase of the buildings and villages on-going 'Heritage'.
- 5.9 The applicant is investing a great deal of money in sustaining, upgrading, repairing converting and extending the buildings, involving internal alterations, replacing electrical and plumbing installations, including insulation and generally bringing accommodation to the requirements of today's living requirements and expectations, all of which reflect the current phase of the buildings and villages on-going 'Heritage'.

DESIGN AND ACCESS STATEMENT

Proposed development in respect of the conversion of 4 Stanley Street, Longridge, into 2no self contained flats with extension along with a new dwelling to rear

5 HERITAGE STATEMENT (Cont.)

- 5.10 It must be borne in mind that the application site is a small scale development that revitalises what at present is an untidy 'mish-mash' of unused/un-utilised areas, which has merit and potential viable use and will help inject life and aid the villages sustainability. The applicants are keen to invest money in the properties and to sustain it within the village. As we are in the throws of a serious world recession, budgets are tight and the works as proposed must be financially viable, and the works must be affordable and not be just a piece in a 'museum' community.

Subject: RE: Sharples Court, Berry Lane, Longridge [Scanned]
 REF. NO. RV\2011\ENQ\00262

320120153P

Dear Karl,

I write in regards to the above Pre-Application Enquiry received on the 17 June 2011, and I apologise for the delay in responding. Following a visit to the site and subsequent discussions with the County Highways Officer, on the basis of the information submitted I can provide you with the following advice.

The proposal seeks to develop two, one bed dwellings accessed off Sharples Court, Berry Lane, Longridge. This site sits within Longridge Town Centre, and within the Longridge Conservation Area.

The site lies within the Settlement Boundary of Longridge and is therefore subject to DWLP Policy G2, which supports development wholly within the built part of the settlement or the rounding off of the built up area. This policy considers consolidating development as a part of this process and defines it as the location of new development to adjoin the main part of the built up area. In addition, as RVBC cannot currently demonstrate a 5-year housing land supply, Planning Policy Statement 3: Housing (PPS3) is also a material consideration. In considering housing development, paragraph 71 states that where LPAs cannot demonstrate an up to date five year supply of deliverable sites they should consider favourably planning applications for housing having regard to the policies in PPS3 including the consideration in paragraph 69, which states that in deciding planning applications, Local Planning Authorities should have regard to,

- o achieving high quality design,
- o ensuring developments achieve a good mix of housing ,
- o the suitability of a site for housing, including its environmental sustainability,
- o using land effectively and efficiently; and
- o ensuring the proposed development is in line with planning for housing objectives

In considering the above, and on the basis of the information submitted to date, the site meets the PPS3 criteria in planning policy terms in relation to the suitability of the site for housing, and as such the principle of the proposal is considered acceptable. There may however be issues relating to the overall design of the properties (especially in relation to the potential impact on the character and setting of the Conservation Area), however no elevational plans have been provided at this time on which I can comment. In addition to this, there is a requirement to fully comply with the relevant policies of the adopted Districtwide Local Plan.

The Affordable Housing Memorandum of Understanding (AMOU) is also a material planning consideration, as it is intended to be both complementary with and supplemental to the relevant policies contained within the Districtwide Local Plan. However, as there are only two units proposed, there is no requirement for Affordable Units.

With regards to parking and other highway safety issues, the LCC Highways Officer has made no adverse comments in relation to the proposal. However, having visited the site I am aware that other residents of Sharples Court park within this courtyard, and any formal proposal would need to indicate that existing parking arrangements are not adversely affected by this proposal.

As with any application of this type, you will be required to submit a Design and Access Statement, a Heritage Statement and a Bat Survey with any formal application

I hope this advice is useful, but please note this is an officer opinion only and whilst my comments are made for your information and guidance only, they are without prejudice to any recommendation the Council may make on any subsequent application or the ultimate determination thereof. Should you wish to discuss the matter further, please do not hesitate to contact me on the above direct line number or e-mail address.

Kind regards,

Graeme Thorpe |

BAT SURVEY & REPORT

Survey Brief

1. To inspect buildings, assess the value of the site for bats, and compile a report prior to a Planning Application being submitted.
2. The report will identify if bats have ever used the buildings at any time, or not as the case may be.
3. If bats have used the buildings, assess the importance of the site for bats and bat conservation.

Limitations of the report

1. The aim of the survey is to prove use by bats, but does not guarantee their absence.
2. Surveys undertaken when bats are hibernating, may have to be re-assessed during summer months when bats are most active.
3. External walls and internal rooms are inspected from ground level only. Roof voids, attics and lofts will only be inspected when safe access is possible. Building's whose structure is unsafe in any way, will only be inspected from a safe distance with the use of a pair of binoculars.
4. A bat detector will be used in all cases but daytime visits may only produce limited success. When buildings are inspected during winter months, a bat detector will have very limited results.
5. Buildings with no signs of bats on the date of the survey, may be used by individuals or small numbers of bats, in subsequent weeks, months or years.
6. Thorough inspection should reveal whether bats have been present during previous years. Small bats, e.g. pipistrelles, leave evidence of occupation in small inaccessible crevices which may be extremely difficult to detect if the bats are not present when the survey is being conducted.

Objectives of the report:

1. To thoroughly inspect all buildings, and record any findings indicating the presence or absence of bats.
2. To make recommendations when the presence of bats are found.

Survey Guidelines

This survey follows guidelines recommended by the Bat Conservation Trust (BCT Bat Surveys, Good Practice Guidelines, 2007) and Natural England (Survey objectives, methods and standards- Bat Mitigation Guidelines, 2004) and JNCC Bat Workers Manual.

Survey Methods

The purpose of the survey is to look for evidence confirming that bats use, or have used the buildings for resting, feeding, roosting or winter hibernacula, or not as the case may be.

Evidence of use will include the following;

- 1 Presence of live or dead bats.
- 2 Bat droppings.
- 3 Moth and insect wings and remains.
- 4 Faint scratch marks on roof timbers.
- 5 Grease staining marks on roof timbers.
- 6 Odour of bats.

Evening Surveys

For evening surveys, an ultra-sound receiver is used, tuned to different frequencies to pick up the noises emitted by flying bats. Bat emergence time may start half an hour before sunset, to one hour after. Fine tuning the 'bat detector' can be a very accurate way of identifying the presence of bats emerging from roof areas where human access is limited or impossible.

Time spent on suitable evenings, will confirm or not the presence of bats, and bat species identification should be possible if bats are present.

Surveying Equipment

Re-chargeable torches, one at 1 million, the other at ½ million candlepower.

8 x 32 Opticron binoculars.

Bat box 'duet' bat detector, a heterodyne type sonar receiver.

Bat Scanner, a heterodyne type instrument which actively scans ultrasound for bats.

Petzl headlamp torches.

A variety of folding aluminium ladders.

Telescopic inspection mirrors, large and small.

BAT SURVEY & REPORT

320120153P

Bat detection methods

The size of the site or the complexity of the buildings may make daytime searches for bats very difficult. Subsequently, the detection of the presence of bats is undertaken by night visits and relies on the use of a bat detector, an instrument that picks up the ultra-sound emitted by bats, converting it into a sound audible to the human ear. Species may be identified by the frequency on which they 'transmit' and by the sonar graph of their sounds.

Evening surveys

Any survey is reliant on the scope and depth of the information sourced. In an attempt to obtain more detail, an evening survey may be conducted around the site or buildings. To give greater coverage and scope, the survey is normally conducted by two persons. Ultra-sound bat detectors were used at varying frequencies throughout the duration of the survey, to pick up noises emitted by bats.

Analysis of results

Dependent on the results indicated by the bat detector, further inspection of the site may be required within the buildings to confirm any findings. Negative results from the bat detector will only indicate that bats are not present at the time of the survey.

Bat habits

Bats frequently use trees and building for feeding. Insects are found at all sites, and their presence attracts bats, which may travel up to five kilometres or more, to feast in insect rich habitat. The presence of feeding bats does not indicate that the roost is close by, and this survey is undertaken to establish whether bats use any of the structures on the site as a roost.

Adverse weather

Adverse weather conditions affect the ability to collect data on night visits. Cold nights, strong wind and heavy rain may prevent bats from flying, and numbers of insects may be likewise very limited. Subsequent visits should provide sufficient data and prove positive or negative results.

Risk Assessment

The level of probability that Bats are using the property is calculated on the evidence found.

Low risk:

No evidence of use by bats was found.

Medium risk:

Implies that the presence or use by Bats has been identified, and the building is probably used as a feeding site.

High risk:

Identifies that Bats use the property, droppings are found and a roost is confirmed or suspected, even if bats are not present at the time of the survey.

BAT SURVEY & REPORT

SURVEY SUMMARY

Proposed Development

The proposal is to re-develop the site.

320120153P

Site Description

The property is central to a small rural town and is surrounded by commercial and residential developments.

Survey Results

The survey could find no signs of bats occupying or ever having occupied the premises.

Importance of the Site

The site has no special wildlife importance.

Conclusions

Bats do not occupy the building.

Risk Assessment

Low

Mitigation and Enhancement

No bat mitigation or habitat enhancement is required.

Timing of works

Works may be undertaken at any time.

Author: Denis Lambert

Signed: *Denis Lambert*

Dated: *1st February 2012*

SURVEYOR'S DETAILS

Denis Lambert is a registered and licensed Bat Warden No. 20110680 for Natural England, since 1981. Dedicated to conservation and environmental issues, he has been a keen bird watcher and mammal specialist all his life and was involved with the formation of the Lancashire Badger Group and acted as its chairman for ten years. Working as a qualified arborist (tree surgeon) he has been actively involved in protecting many species of flora and fauna over the years. Richard Bowden, a retired ex-licensed Bat Warden assists with surveillance where two persons are needed.

BAT SURVEY & REPORT

Bats and the Law

320120153P

It may not be possible to determine whether the building is used as a maternity roost or just a resting place, but the fact that bat activity has been recorded, means that any work that disturbs or impacts on the colony within the buildings will require a license. Additional survey work may be necessary, especially in the evenings or early morning to determine the exact extent of use by bats and the access points that are used. Deliberate disturbance during the breeding season, the exclusion of bats and the destruction of a bat roost is now a criminal offence under the Conservation (Natural Habitats &c.) (Amendment) Regulations 2007. The onus lies on the applicant to satisfy him/her that no offence will be committed if and when the development goes ahead.

Natural England now advises, *"Operations to known breeding sites should be timed to avoid the months of June, July and August if possible, the best times for building or re-roofing operations are spring and autumn"*.

How to proceed when bats are found

Depending on the extent of the proposed works, a license may be required before any work can start. If the work does not impact on the bats in any way, ie, bats are not present and the habitat and access points are not being affected, then the work may probably be done without a licence. Each site has different requirements and Natural England have the final say.

When European Protected Species are present and the works cannot be done at a time when they are absent, as a licensed bat person, I can apply on your behalf for a licence to enable the works to proceed. The granting of a license is not guaranteed, but when the application is a matter of health and public safety and supporting mitigation enhances the habitat for continued use by bats, there is a good likelihood that the license will be approved. Natural England requires a minimum six weeks to process any licence application. Mitigation will include detailed information for the retention, enhancement and preservation of the population of European Protected Species in the locality.

General recommendations:

Being aware of how bats move from site to site, and the possibility that bats may occur in any building, the following points should help developers.

1. Bats may use buildings at any time of the year for feeding or refuge.
2. Work to the roof should be undertaken when bats are free flying, generally early March to late November.
3. Care must be taken when removing existing roof beams and associated stonework.
4. During completion of roof works, bat access points may be built into the new structure.
5. Pointing of walls should not be carried out between mid-November to early March to avoid entombing bats, which may be hibernating within.
6. If any timber treatment is carried out, only chemicals safe for bats should be used. Any new timber used should be treated using the CCA method (Copper, Chrome Arsenic), which is safe for bats.

I shall be available to advise and oversee the above points at any time, if requested.

Should bats be found, work must cease immediately in that area and then please contact:
Denis Lambert on 01772 783322 or 07813 140682 for advice.
