Title: Proposed S-SW Elevation, Withinreap Barn

Application: PP-01795018

File: PP01795018.proposed-SSW-elevation.jpg

Scale: 1:60 when printed at A4

This side of the barn was the shippon, and is now a single storey frontroom. Exact positioning of the windows will be dependent on the internal positioning of roof beams in the frontroom, but both windows will be below the line of the chimney and at the same height. It is planned that the windows will open matching the existing, 1st floor, Velux window.
