27 APR 2012

Dear Mr Macholc

PROPOSED: Mixed use development comprising residential (C3), Nursing Home (C2), Car parking, open space and ancillary landscaping. Land to the east of Clitheroe Road (Lawtonsteads), Whalley (3/2012/0327P)

The Heritage Statement compiled by Northern Archaeological Associates (NAA) concludes that accompanies the application suggests in Section 6.6 that there is a small potential for the site to contain previously unrecorded archaeological remains from the prehistoric and/or Roman periods. The Statement (Section 7.1) goes on to recommend that this potential be tested by means of geophysical survey. LCAS would agree that such a methodology would be a rapid and cost-effective means of assessing the archaeological potential of the site for such remains.

Consequently, should the Local Planning Authority be minded to grant planning permission to these or any other schemes, Lancashire County Archaeology Service would recommend that the applicants be required to undertake a programme of staged archaeological work (geophysical survey and excavation of potential archaeological features), and such works should be secured by means of the following condition, which should be attached to any planning permission which may be granted;

Condition: No development shall take place until the applicant, or their agent or successors in title, has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.

Reason: To ensure and safeguard the recording and inspection of matters of archaeological importance associated with the site

Specifications and a list of professionally qualified archaeological organisations that could carry out appropriate archaeological works can be obtained from Lancashire County Archaeology Service
