Lesley

In response to your email sent to Gary earlier today, I add the following information, (for clarification and reference the following is taken from product information relating to the 'Sharp ND Series' of PV panels:

Width - 994mm
Height - 1652mm
Thickness of panel - 46mm
Height from roof - 50mm
Colour - The cells of the panel are made of photovoltaic modules made of polycrystalline silicon solar cells. Textured cell surface for particularly high electricity yields BSF structure (Back Surface Field) to optimise cell efficiency Use of tempered white glass, EVA plastic, and weather protection film, as well as an anodised aluminium frame with drainage holes for long-term use

I hope that the above is satisfactory and provides you with the information which you require.

Would you be able to confirm that the application has been validated and is now live.

If you need any further assistance please do not hesitate to contact me.

Kind Regards

Andrew Mitchell
