F.A.O Colin Sharpe

Dear Mr Macholc

PROPOSED: Replacement dwelling and attached barn including link to detached barn all to create a single dwelling including detached garage and annex. Replacement agricultural building and demolition of agricultural buildings. Halton Hill, Garstang Road, Chipping (3/2012/0508)

The farmhouse and barn (building 2) are thought to be depicted on the 1st Edition Ordnance Survey 1:10560 (Lancashire Sheet 46), surveyed 1844, and the Heritage Statement records buildings on the site on the slightly earlier 1840 Chipping Tithe Map of 1840. Consequently the buildings should therefore be considered to be of some historical interest, dating to the first half of the 19th century, having undergone a number of alterations in response to changes in agricultural practices and economics. The period 1750-1880 has been recognised as the most important period of farm building development in England.

The proposed demolition and conversion will have a significant impact on the historic character and appearance of the buildings, and result in the loss of some historic fabric. The CBAs '*An Archaeological Research Framework for North West England: Volume 2, Research Agenda and Strategy*' has indicated that "there is an urgent need for all local authorities to ensure that farm buildings undergoing adaptation are at least considered for recording" (p. 140) so that "a regional database of farm buildings can be derived and variations across the region examined." (ibid.)

Consequently should the Local Planning Authority be minded to grant planning permission to this or any other scheme, the Lancashire Archaeology Service would recommend that the recording of the buildings prior to conversion be secured by means of the following condition:

Condition: No works shall take place on the site until the applicant, or their agent or successors in title, has secured the implementation of a programme of building recording and analysis. This must be carried out in accordance with a written scheme of investigation, which shall first have been submitted to and agreed in writing by the Local Planning Authority.

Reason: To ensure and safeguard the recording and inspection of matters of archaeological/historical importance associated with the building.

Such a recommendation is in accordance with PPS5 Policy HE12.3 (Where the loss of the whole or a material part of a heritage asset's significance is justified, local planning authorities should require the developer to record and advance understanding of the significance of the heritage asset before it is lost, using planning conditions or obligations as appropriate)

Specifications and a list of professionally qualified building recording consultants and organisations which could carry out the appropriate archaeological works can be obtained from Lancashire County Archaeology Service:
