Subject: 0848 50m meteorological mast

Hi Grahame

1. The proposed locations for this mast is in close proximity to the following:-
 - Car parks provided for ramblers, tourist etc. the car parks are positioned panoramic views of Pendle Hill had the surrounding countryside
 - Woodland and woodland trails, well used by Dog owner and hikers.
 - Designated pathway.

As such, the Parish Council of simonstone consider that the location is inappropriate.

2. It should be noted that the land is currently used for sheep farming.
3. Whereas the mast will not be immediately visible from local households, it will ne immediately visible to those walking in the immediate locality, as will be seen on the skyline by the residents of Padiham and Burnley

Kind Regards

Roger Hirst

Clerk to Simonstone Parish Council
