F.A.O Claire Booth

Dear Mr Macholc

PROPOSED: The reinstatement of residential use of Cocklick End Farmhouse and the conversion of the adjoining barn for residential purposes together with minor alterations to the building and associated works including improvement of the access track. Cocklick End, Farmhouse and Barn, School Lane, Slaidburn (3/2012/0984)

Cocklick End is a non-designated heritage asset, recorded on the County Historic Environment Record, PRN 13407, as containing a lintel dated 1727 inscribed with the initials 'T G C' above 'R C', but the farm is thought to possibly be originally 17th century in date. The barn is 19th century, with a datestone 1827 and the initials 'W C E'.

The building should therefore be considered to be of some historical interest, dating to the first quarter of the 18th century (the 1727 datestone is considered to be a likely date for construction), but having undergone a number of alterations in response to changes in agricultural practices and economics. The period 1750-1880 has been recognised as the most important period of farm building development in England.

The proposed conversion will have a significant impact on the historic character and appearance of the building, and may result in the loss of some historic fabric. The CBAs '*An Archaeological Research Framework for North West England: Volume 2, Research Agenda and Strategy*' has indicated that "there is an urgent need for all local authorities to ensure that farm buildings undergoing adaptation are at least considered for recording" (p. 140) so that "a regional database of farm buildings can be derived and variations across the region examined." (ibid.). Consequently should the Local Planning Authority be minded to grant planning permission to this or any other scheme, the Lancashire Archaeology Service would recommend that the recording of the buildings prior to conversion be secured by means of the following condition:

Jo Turton • Executive Director for the Environment
Environment & Public Protection Services • Environment Directorate
PO Box 100 • County Hall • Preston • PR1 0LD

Condition: No works shall take place on the site until the applicant, or their agent or successors in title, has secured the implementation of a programme of building recording and analysis. This must be carried out in accordance with a written scheme of investigation, which shall first have been submitted to and agreed in writing by the Local Planning Authority.

Reason: To ensure and safeguard the recording and inspection of matters of archaeological/historical importance associated with the buildings.

Such a recommendation is in accordance with National Planning Policy Framework, para. 141 – Local planning authorities should make information about the significance of the historic environment gathered as part of plan-making or development management publicly accessible. They should also require developers to record and advance understanding of the significance of any heritage assets to be lost (wholly or in part) in a manner proportionate to their importance and the impact, and to make this evidence (and any archive generated) publicly accessible.

Specifications and a list of professionally qualified building recording consultants and organisations which could carry out the appropriate archaeological works can be obtained from Lancashire County Archaeology Service:

Lancashire County Council
