Subject: Planning Application - Jones Stroud 3/2012/1049P - Construction of Storage Shed & Engineering Building

Graeme,

Further to our recent discussions, I wish to make the following comments;

- No objection in principle to the application;
- applicant to provide comprehensive noise assessment report concerning proposed use of new buildings - to include: construction of roof, hours of use, anticipated movements, hours of deliveries, control of noise generating activities to prevent impact on neighbouring residential properties, consideration of provision of suitable acoustic barrier between proposed and existing buildings etc

Please can you advise the applicant that any material changes need to be considered and if necessary reflected in the amendment of the sites PPC process permit

Regards James
