# DESIGN AND ACCESS STATEMENT PRO-FORMA

From the 10 August 2006, planning applications relating to certain types of developments are required to be submitted with a design and access statement. When submitting an application, failure to provide a design and access statement of sufficient standard may result in a delayed registration of the application.

## What Applications Need to be Accompanied by a Design and Access Statement?

Most planning applications have to be accompanied by a design and access statement, the exceptions being:

- material change in the use of land or buildings, unless it also involves operational development;
- engineering or mining operations;

October 1811 A 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Process What factors have you considered when deciding upon the use, design, scale, layout and materials used in the proposed development?
-4
Economic a emisonmental factors, in that the cost homes
Economic a emissionmental factors in that the cost bones analysis fer represent of these windows with UPVC windows is superior to that of tempes representation
Use
What will the extension/development be used for and justify why this is necessary?
The premises are currently used as a tubble House,
The premises are convently used as a Public House, there is no entension/development as such as the application is for window replacement in a conservation area the premises will continue to be used as a public
house.
Amount
What is the proposed size of the extension/development and why is this necessary and appropriate for the setting of the development?
There is to be no saleusien / divelopment

320130078P
Layout  Why have you chosen the layout specified in the planning application and how did you eliminate alternative options?
There is no development so this question is not
Scale Is the scale of the extension/development in keeping with the context of the site and in what way?
there is no development so this question is not applieable
<b>Landscaping</b> If appropriate, specify the boundary treatments and any landscaping included in the development. You may need to justify why certain materials or planting have been used?
There is so development so This queation is not
Appearance Specify how the extension/development fits in terms of its appearance and include details of materials to
be used. The winders will be repeased with "like few like" winders in that the design of them will be similed to the earsting winders to just be fitten pane a opening top light. The bottom fined light and be fitted with obscure glass after two light clear glassing. The spill of fixed opening was be in a similar propertien. The windows will be what up to the frames are a similar suge to the existing.

#### Access

Explain how the extension/development will be accessed by vehicles and people. You should consider the need for access by all members of society and emergency vehicles.

### De Lacy Arms, 61 King Street, Whalley, BB7 9SP

The property in question is within the Whalley Conservation Area which was designated in 1972.

A property has been in the current location at least since 1818 (Greenwood Map of Lancashire) and is shown as a public house in the first edition Ordnance Survey Map of 1890. Its size and shape would not appear to have been altered, as far as can be determined, over the years. The building itself would not appear to be of any significant architectural value.

The windows to be replaced are situated on the North side elevation onto Church Lane, at ground floor level and there are four in number. The windows currently fitted at ground floor level are not the original windows but are of a modern design (top hung sash windows) probably installed in the 50's or 60's. One possibly later as it has had double glazing installed.

The Whalley Conservation Area Management guidance consultation document published in December 2006, External Alterations, says that the guidelines are intended to discourage the continuing loss of original architectural detail - as the original windows have already been replaced with those of a more modern design, that feature has already been lost to the building.

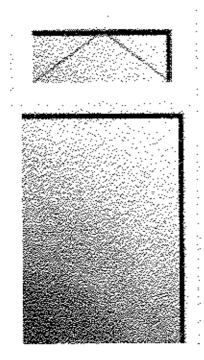

The proposal is to replace the timber windows with UPVC windows and 28mm double glazing. The design of fixed bottom pane (obscured glass) and top opening light will be to the same design and proportions as the existing windows, whilst the current UPVC profile will be marginally smaller than the existing timber windows it will be very similar to the profile of a new timber window.

It is not felt that the fitting of UPVC windows will have much of an effect on the character of the Conservation Area as in this location it has in all probability already been lost. One only has to walk a few yards up Church Lane to see UPVC windows and doors, in a variety of designs and colours fitted in the cottages on the right hand side of the lane and also in the Grade 2 listed buildings.

This issue was highlighted on page 18 of the Whalley Conservation Area Appraisal of 2005 where in the Character Areas and Zones, one of the negative features was the existing fitment of UPVC windows and doors to the cottages and the primary school, establishing that the character of the conservation area had already been lost, this is again raised in the issues section on page 23.

In the Town and Country Planning (General Permitted Development) Amendment (England) Order 2010 when dealing with development of Commercial Premises part 42, the point is made that materials used in "Conversation Areas" should be of "similar visual appearance" to those in the existing buildings but does not mean that they need to be the same materials, be an exact match, or have similar technical properties.

To summarise, the windows proposed will be to a similar design and proportion to the existing windows, will be of a different material, providing enhanced thermal capability over replacement timber windows.

No.37 0130078 P New windows will have clear glans in top opening leght
