The Address of Proposed Building

Council Offices
Church Walk
CLITHEROE
Lancashire
BB7 2RA

3 2 0 1 3 0 2 7 6 P

Proposal

The proposal is for replacements signs above the archway at the top of the car park. Presently there are signs in the same location as we propose to put the new signs, the lettering is slightly different (3D effect) to which we propose to install the council crest next to the lettering.

The Building Location

The council offices are within Clitheroes conservation area, they were built towards the latter of the 19th century, they consist of 4 floors with a stone cladding, a slate traditional pitch roof in various locations. The council offices have been built with the use of concrete blocks clad with stone with a cavity void. The floors are concrete with concrete pillars. They are not on a main road however there is a large car park situated on its grounds. There is a road/path to one side of the car park to which leads you to the centre of Clitheroe town, there are also public toilets situated approximately mid way on the road/path.

Assessment of impact

The impact of the new signs will be minimum.

As such it is understood that the work should not compromise the special architectural and historic interest of the area.

Aim

Our aim is to improve quality to the lettering and to show RVBC Crest with pride.

The proposed Alterations

To replace the existing signs as below:

2 sets of 3500mm long x 800mm high built up stainless letters. Black face and returns for the text. Crest to be with white returns and print mounted to face. Fit to wall using rods to sit straight.

Summary

In summary it is the aim of the applicant to improve the property without compromising either the nature of the property, or compromising the conservation area or this building.
