DESIGN OBJECTIVES

- To obtain Full Planning Approval for widening and improving the existing vehicular access.
- To create a safer and less congested entrance to the site.
- To keep the style and character of the existing stone entrance wall and post.

DESIGN PROPOSAL

PL. 1. Illustrating existing narrow entrance

The main entrance to the site from Whalley Road currently does not allow for two way traffic to enter and exit the site simultaneously. The current width is narrow for its use at 3.89m and we are proposing it be widened to 7.8m to allow for vehicles to access and exit more safely.

With Child Action North West expanding in recent years, occasionally up to 48 cars can be present at one occasion on-site. Whalley Road is a major link into Blackburn and traffic is busy at peak times. It has become problematic to enter the site whilst a car is exiting, which then causes disruption to the main road. It had been originally proposed to create a one way system by widening the smaller access road to the West, however, delivery vans regularly park along the front of the building which would likely cause problems and blockages for cars accessing the site. This was therefore not feasible and was disregarded for this reason.

3 20130462 P

The new road surface is to be that of a macadam surface to match the existing surface present. Existing lighting bollards to this area are to be relocated to illuminate the proposed kerb position. (See drawing 4275-03).

The access will be clearly marked with road markings as illustrated on drawing ref 4275-03, again to improve vehicular / drive safety.

Proposed lighting to the car park has been designed by Philips technical lighting department in order to minimise disruption to the surrounding houses. The lighting Lux areas are illustrated by the outer blue and inner red circles on drawing ref: 4275 – 07A. The single lamp post has been positioned centrally with 3 no. bollards adjacent have been designed by Phillips on drawing 13-391-CBJ-R0 and A4 calculation summary.

ACCESS STATEMENT

The existing entrance achieves the min. 60m clear visibility required in both directions as stated within LCC Road Design Guidance, illustrated in PL. 2.

PL. 2. 60m clear visibility splays looking left and right from centre of main access
