

**PLANT SCHEDULES:**

**Native Hedgerow Mix:**

Species	Percentage	Total:
Crataegus monogyna	60%	264
Acer campestre	20%	88
Prunus spinosa	10%	44
Rosa canina	5%	22
Ilex aquifolium	5%	22

Plant at 5 per linear metre in a double staggered row 300mm between rows. Transplants 600-900mm high.

**Woodland Understorey Mix:**

Species	Percentage	No.	Height (cm)	Form
Corylus avellana	35	445	600-900	Bare root
Ilex aquifolium	30	382	450-800	3L container
Sambucus nigra	35	445	600-900	Bare root

Planted at 3no. per m2.

**Tree Schedules:**

Species	No.	Girth (cm)	Form
Quercus robur	6	12-14	RB
Pinus sylvestris	3	12-14	RB
Acer pseudoplatanus	1	12-14	RB
Fagus sylvatica	2	12-14	RB
Tilia x europaea	3	12-14	RB

RB= root ball

**Specification notes:**

**General**

- All composts, mulches and soil conditioners should be peat-free.
- The use of pesticides (herbicides, insecticides, fungicides and slug pellets etc) is discouraged. Any pesticides that are to be used should be non-residual.

**Trees**

- All trees shall be planted in pits generally 1000 dia x 800mm deep or at least 150mm wider than the existing root system / rootball. Pits shall be dug with vertical sides and the bottom and sides of the pits roughened with a fork to assist in free drainage and root penetration. Any extraneous matter including weeds, broken brick and large stones shall be removed.
- Excavated topsoil shall be set aside for reuse. The pits shall be backfilled with topsoil incorporating 2 nr 80 litre bags of tree planting and mulching compost.
- All trees shall be double staked to horticultural practice using peeled larch stakes and rubberized tree ties as detailed.
- No Ash trees are specified on this drawing nor should any Ash be used as a replacement species by planter.
- Planting and within root protection areas should be individually dug avoiding existing tree root. No scraping of surface when preparing ground for grass or plants.
