From Bowland Forest higher division parish council

Dear John

Following the parish council meeting last night the council would like to submit the following observations:

1. Could the status of the land be confirmed to the parish council please - is it owned by United Utilities and common land? The parish council is anxious that the land remains as common land. At a meeting in 1982 it was accepted by NWWA as common land.
2. Should the AONB be contacted about this issue if it hasn't already been consulted?
3. The parish council would like confirmation of who will maintain the monument in future - the parish council does not want responsibility for it.
4. There were questions about the positioning of the monument and whether it is in the best position.

Generally the council thought the sentiment is a good one.

Thank you
Rachel Carr
clerk
