Specification

A shortage of natural nesting sites is thought to be a contributing factor in the decline of many of our once-common bird species. Providing a nest box in your garden is a fantastic way to encourage them to breed and improve their chances of survival.

The House Sparrow Terrace is a wide box which is split into three chambers and which will thereby provide nesting space for three pairs. This is particularly important for these birds as they are very social and like to nest in a colony. House sparrow numbers have undergone a dramatic decline in the UK and parts of Europe, with lack of suitable nesting sites thought to be one of the key drivers. Providing a secure nesting site and warm overwinter roosting site could greatly aid in increasing adult and nestling survival.

This box is made from FSC certified timber and has an attractive flamed surface and black roof. It should be sited on the wall of a building between 1.5 and 5.5m above ground, preferably avoiding areas that are exposed to strong sunlight or prevailing winds. Siting boxes near to vegetation is helpful for young birds taking their first flights.

The box may be cleaned out during winter after any inhabitants have left. If you wish to wash the box at the same time we would recommend using only hot water.

Height 325 mm, Width 410 mm, Depth 190 mm, Weight 3.6 kg.

Description	Write a review	Specification
-------------	----------------	---------------

This attractive wooden bat box has two internal chambers and is constructed from natural sustainable materials. The heavy construction provides good insulation and longevity, as well as preventing predators from chewing the entrance slot. The front door is hinged for inspection and cleaning.

This box is suitable for siting on trees in gardens or woodland and also on house walls. It is simple to install and the timber requires no annual maintenance. Site 2.5 - 5m high on a building, mature tree or vegetation line (trees/tall hedge) or on a feeding/flight route in partial daytime sun.

Wooden boxes should not be painted or treated with any type of preservative, as these can harm the bats.

Made using FSC certified wood.
