Details

SD 64 SW CHIPPING

4/103 Wolfen Hall II

House, possibly C16th, altered 1867-8. Slobbered rubble with steep slate roof. 2 storeys, 2 bays, with end stacks. Windows have plain stone surrounds with wooden casements. The door, between the bays, has plain reveals. The chimney caps have copings and weathered offsets. At the rear is a parallel range which appears to be of a later date. Interior. The right-hand room has, in its rear wall, a blocked 5-light tall wooden- mullioned window with wooden lintel and sill and splayed wooden jambs. Between the hall and the left-hand room is a timber-framed wall which rises through the 1st floor. A main post, against the front wall of the house, is tenoned into the tie beam at 1st floor ceiling level. The rear wall of the left-hand room, separating it from the stair hall at the rear, is also timber framed with many redundant peg holes suggesting re-use or reconstruction. Between the entrance hall and stair hall is a chamfered wooden door surround with 4-centred head. The dog-leg stair has been reconstructed but retains its C17th handrail and moulded newel. A stone wall, now dividing the rear wing but formerly an external wall, has a blocked window with wooden mullions. A drawing in the Weld collection at the Harris Art Gallery, Preston, dated 1841, shows the house extending further to the right (north-east) where a later C19th extension now adjoins. The drawing also shows a chamfered doorway with an ogee head. This feature is not necessarily of medieval date. Smith, T.C. History of Chipping. Preston, 1894, p. 226.
