

EXISTING UNIT

PROPOSED UNIT

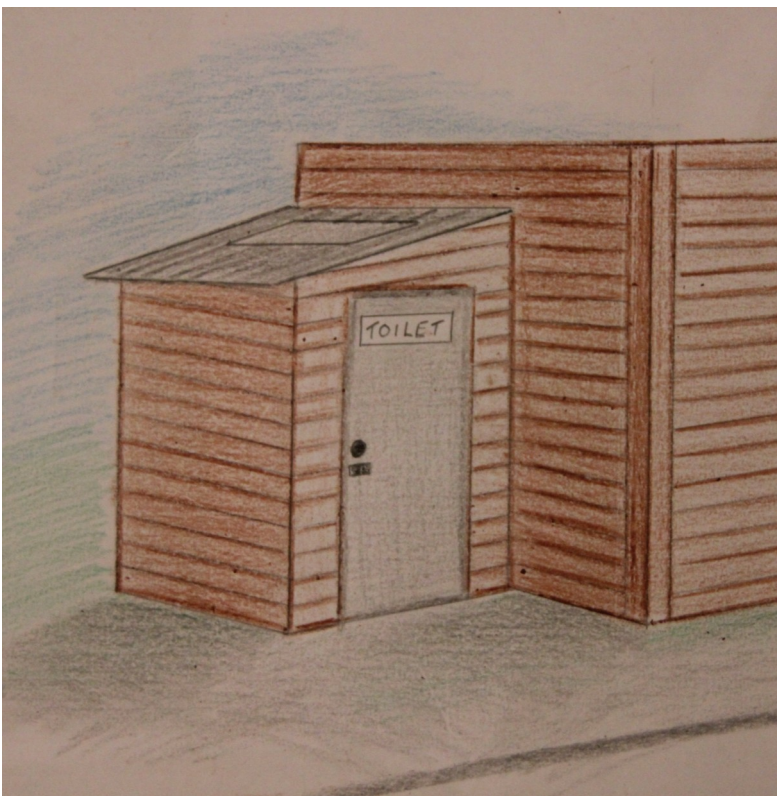

EXISTING TOILET

Existing toilet is constructed from various bits of pre used wood. The roof badly leaks and the door does not fit in the door frame, there is also a large window in the door.

PROPOSED TOILET

Proposed toilet will be constructed from wood and clad in the same material as the cabin to match. The door will not have a window instead there will be a roof window. Electrical fittings and the drain pipe will be moved to the side of the cabin behind the toilet to give a tidier appearance.

The toilet is emptied weekly by a contractor. (same contractor empties the sink waste from the cabin)

This is the proposed material for the cladding on both the cabin and the toilet.
It is exactly the same as what is used on the existing unit.

Description:

300mm Light Oak interlocking tongue and groove soffit (fixes in to an edge trim)

Light Oak Hollow Soffit : T & G Hollow Soffit in 5m lengths. Because of its attractive panelled effect and easy to install friendly tongue and groove system profile, hollow soffit is a favourite with installers and home-owners alike.
