

## Interactive Maps

**Risk of Flooding from Surface Water for X:372916, Y:444076 (BB73TB)**

The location you have selected is in an area that has a very low chance of flooding from surface water.

**Very Low**

Low

Medium

High

**What does 'very low' mean?**

Very low means that each year, this area has a chance of flooding of less than 1 in 1000 (0.1%).

This type of flooding can be difficult to predict, much more so than river or sea flooding as it is hard to forecast exactly where or how much rain will fall in any storm.

This is based on the best information we have available, such as ground levels and drainage.

**Floods Destroy. Be prepared**

Don't wait until it's too late. Prepare for flooding by taking some simple steps to reduce the impact on your home or business.

**Further Information**

The map has been produced by the Environment Agency, using information from Lead Local Flood Authorities where it is available. Lead Local Flood Authorities are responsible for managing the risk from surface water flooding.

If you have questions about how the map was produced, please call Floodline on 0845 928 1133.

If you would like more information on how surface water is being managed in this area, you can speak to Lancashire County Council.

You can use the information in this area to see the approximate areas that would flood, and which parts would be shallower or deeper.

The potential impact of surface water flooding can vary according to the depth of the water, and its velocity (speed and direction that it is flowing in).

This area may be at risk from other types of flooding.
