

# Green Roof

To help soften the lines of the proposed building and improve the biodiversity of the site, I would advise adding a condition that the roof be planted with one or a mixture of the species below. The roof can easily be adapted to support the "Green Roof"

*Sedum spathulifolium* 'Cape Blanco'

*Pulsatilla vulgaris*, Pasque flower

*Festuca glauca*, Blue fescue

*Saxifraga* 'Suendermannii'

'Adding a green roof to buildings such as sheds and storage areas reclaims the space they take up, as well as improving air quality and encouraging wildlife.'
