Morning Adam,

I would have concerns regarding the parking provision associated with this development . The parking allocation to this unit has not been referred to within that application documents but on the basis of the location plan it would appear that 2 parking spaces are associated with each unit. Bearing this in mind , it is unclear from the application whether the training sessions offered to customers will be on a 1 to 1 basis or will involve classes. It would be the latter scenario which would cause parking issues, and affect the parking availability for the other units on the site.

I would therefore require further clarification on how the facility would be run and the maximum number of customers that would be on the premises at any one time
