

Prior Notice for a replacement agricultural storage building

Closes Hall Farm, Stump Cross Lane, Clitheroe, BB7 7LX

Existing building

The existing building is dilapidated and unusable. The proposed replacement is to enable the applicant to tip and store in bulk individual components of feedstuff required to mix into a specific diet for the cattle at the site.

The replacement provides adequate height to allow articulated vehicles to tip the contents into the building with safe working headroom required for modern vehicles.

The realignment of the building will also allow more room in the actual yard area for the turning and manoeuvring of general farm traffic, which is all now much larger and bulkier than previously.
