Signage/Standard face Flags

The new flags have the **standard face** 'swirl pattern' incorporated into the design.

Flags help create a landmark presence for a development and help visitors navigate to the site. Flags come in one size and shape. They are single sided and the rotating arm ensures they are visible even if there is no wind.

Flag

Material: Heavy duty 150g knitted Polyester

Standard flag size: 1000mm x 2000mm

Colour: TW Grape or TW Rubine Red

Flag pole/rotating arm kit

Material: Aluminium or fibre glass depending on site conditions.
