Please find the Application of approval reserved by condition accompanied by the picture showing the 5 points that have covered for the details supplied for flood mitigation.

Photo 1 The floor no lower than the level as the existing house

Photo 2 a,b All plug sockets are at a height of 750mm above the slab

Photo 3 A none return valve has been fitted to the inspection chamber where it branches to the downstairs w.c.

Photo 4 Both the light and the sockets in the extension have been fitted into separate circuits that are protected by a separate R.C.D and certified.

Photo 5 a,b,c Are of the receipts provided by Travis Perkins for the lime plaster purchased for the lime plastering also a picture of the lime plaster.

(I did have a picture of more detail however An update on my phone reformatted my sd card losing the pictures I had). I could retake the others however due to the wall having been painted this is difficult. I can assure you that up to the 1.5mtr height lime renovating plaster and finish has been applied where stated.

Photo 6 A flood gate.

Kind regards

Kevin Daly
