## MATERIALS

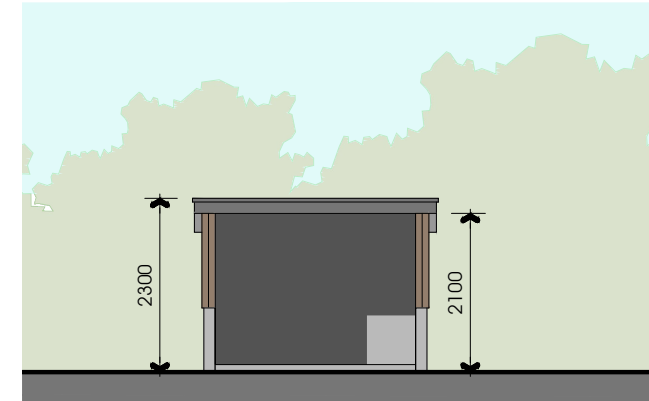

Dark grey Onduline profiled roof sheets  
Treated timber boarding to walls and doors  
Black uPVC gutters and downpipes

## GENERAL GUIDANCE;

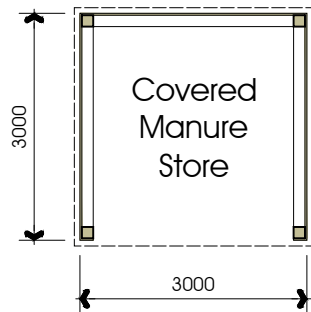

Manure should be managed in accordance with The Code of Good Agricultural Practice (COGAP) for the protection of water, soil and air (produced by DEFRA). Permanent stores for solid horse manure should have bases that do not let liquids pass through and the bases should slope such that liquid run-off is contained within the store. Applicants should consider providing a roof to keep rainfall off the manure to minimise the volume of liquids produced and reduce odour by keeping the manure as dry as possible.
