To who it may concern

I am writing this heritage statement to support the planning application I have put in for the property addressed above. I wish to replace the wooden windows and doors as they are rotting. I wish to replace them with white UPVC windows and rear door . I wish to replace the front door with a chart well green composite door. I feel this will enhance the look of the property, make it more secure and will be better for heat retention in the winter months.

I feel that these changes will not deter from the conservation area principles.

Yours sincerely,

Alison Ashton
