### APPLICATION CONSULTATION RESPONSE

<b>Application Number:</b>	3/2019/0981
<b>Location:</b>	Construction site A adj New Laithe Farm Slaidburn Road Newton BB7 3DL Construction site B adj Booker Farm Slaidburn Road Waddington BB7 3JJ
<b>Proposal:</b>	EIA scoping request for the installation of tunnelled pipework at the Marl Hill Section of the Haweswater Aqueduct and associated works.

Thank you for consulting the Lead Local Flood Authority (LLFA) on the above Environmental Impact Assessment (EIA) Scoping Opinion. The Flood and Water Management Act 2010 sets out the requirement for LLFAs to manage 'local' flood risk within their area. 'Local' flood risk refers to flooding or flood risk from surface water, groundwater or from ordinary watercourses.

Comments provided in this representation are advisory and it is the decision of the Local Planning Authority (LPA) whether any such recommendations are acted upon. The comments given have been composed based on the current extent of the knowledge of the LLFA and information provided with the application at the time of this response.

#### **Lead Local Flood Authority Position:**

We have considered the EIA scoping report insofar as it relates to our remit as LLFA. We agree with the scope outlined in report no. B27070CG (Titled: Haweswater Aqueduct Resilience Programme - proposed - Bowland Section EIA Scoping Report; by Jacobs, dated October 2019) and have no further comments to add at this time.

Matters concerning surface water flood risk and surface water management are expected to be adequately addressed at the detailed planning application stage.

Yours faithfully,

**Chris Dunderdale**  
Lead Local Flood Authority
