

Site Layout Plan Scale 1:500

Block Plan Scale 1:1250

1. The yard between the barn and the farmhouse is used occasionally with agricultural machinery by our neighbour to his small area of land. Although I own the yard outside the barn, I very rarely use it with machinery as I have no need to access any land on that side of the farm. Therefore a drop off point could easily be created outside the barn whilst still having room to pass.
2. Provision for BBQs and seating areas could be provided elsewhere on my land, for example next to the parking area
3. Noise could be restricted between hours to be arranged similar to the Camping and Caravan Club site.
4. Outdoor lighting as appropriate will be provided.
5. Waste bins will be stored in an appropriate screened area.
6. Parking in the yard will be for short term drop off only to avoid congestion in that area and to continue to provide access to all people requiring it.

Guests visiting the holiday cottages have their own area for parking directly outside each property.

D	Alternative area shown for carparking closer to barn, barbecue area	01.08.2021
E	Area for extra outside of barn	07.01.2021
C	Change to Camping Barn	25.07.2020
B	Red line edged around line of access track	11.08.2020
A	Blue line edged around other land in the applicants ownership	11.08.2020
