

Bowland Wild Boar Park

Proposed holiday lodges - lighting

Lighting around the lodges to be Rolec Natralite or similar design. A single lighting post will be located next to each lodge with light directed to the lodge and away from the woodland and potential bat foraging areas.

Lighting can focused downwards on pathways and will be warm-white LED bulbs. This product provides light without causing any light pollution to the wider environment. This type of lighting will protect the dark skies experienced in this area of the Forest of Bowland.

Company: Rolec services Ltd
