Your ref 3/2020/0650
Our ref 23rd September 2020
Date

Dear Sir / Madam

Application: 3/2020/0650

Application Site: 23 – 25 Old Row Whalley Road Barrow

Proposal: Side: Demolition of Building.

The application is for the demolition of the former Restaurant forming 23 -25 Old Row Barrow. Whilst I would raise no objection to the proposal there is limited information available on the planning website detailing how the demolition is to take place and what measures will be introduced to maintain the safety of pedestrians and road users for this reason, should your council be minded to approve this application I would request that the following conditions be attached to any permission that may be granted

1) Pre – Construction.

a) Highway Condition Survey.

No development shall take place (including investigation work, demolition, siting of site compound/welfare facilities) until a survey of the condition of the adopted highway has been submitted to and approved in writing by the Local Planning Authority. The extent of the area to be surveyed must be agreed by the Highways Authority prior to the survey being undertaken. The survey must consist of:

- A plan to a scale of 1:1000 showing the location of all defects identified;
- A written and photographic record of all defects with corresponding location references accompanied by a description of the extent of the assessed area and a record of the date, time and weather conditions at the time of the survey.

Phil Durnell

Director of Highways and Transport
Lancashire County Council

Cuerden Mill • Cuerden Way • Bamber Bridge • Preston • PR5 6BS

No building or use hereby permitted shall be occupied or the use commenced until any damage to the adopted highway has been made good to the satisfaction of the Highway Authority.

Reason: To ensure that any damage to the adopted highway sustained throughout the development process can be identified and subsequently remedied at the expense of the developer.

b) Construction Management Plan (CMP).

No development shall take place, including any works of demolition or site clearance, until a Construction Management Plan (CMP) or Construction Method Statement (CMS) has been submitted to, and approved in writing by the local planning authority. The approved plan / statement shall provide:

- 24 Hour emergency contact number;
- Details of the parking of vehicles of site operatives and visitors;
- Details of loading and unloading of plant and materials;
- Arrangements for turning of vehicles within the site;
- Swept path analysis showing access for the largest vehicles regularly accessing the site and measures to ensure adequate space is available and maintained, including any necessary temporary traffic management measures;
- Measures to protect vulnerable road users (pedestrians and cyclists);
- The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
- Wheel washing facilities;
- Measures to deal with dirt, debris, mud or loose material deposited on the highway as a result of construction;
- Measures to control the emission of dust and dirt during construction;
- Details of a scheme for recycling/disposing of waste resulting from demolition and construction works;
- Construction vehicle routing;
- Delivery, demolition and construction working hours.

The approved Construction Management Plan or Construction Method Statement shall be adhered to throughout the construction period for the development.

Reason: - In the interests of the safe operation of the adopted highway during the demolition and construction phases.

Note: Construction Management Plan.

- There must be no reversing into or from the live highway at any time – all vehicles entering the site must do so in a forward gear, and turn around in the site before exiting in a forward gear onto the operational public highway.
- There must be no storage of materials in the public highway at any time.

- There must be no standing or waiting of machinery or vehicles in the public highway at any time.
- Vehicles must only access the site using a designated vehicular access point.
- There must be no machinery operating over the highway at any time, this includes reference to loading/unloading operations – all of which must be managed within the confines of the site.
- A licence to erect hoardings adjacent to the highway (should they be proposed) may be required. If necessary this can be obtained via the County Council (as the Highway Authority) by contacting the Council by telephoning 01772 533433 or e-mailing lhsstreetworks@lancashire.gov.uk
- All references to public highway include footway, carriageway and verge.

c) Construction deliveries outside peak traffic.

Deliveries to the approved development shall only be accepted between the hours of (9.30am) and (2.30pm) Monday – Friday, to avoid peak traffic on the surrounding highway network.

Reason: In the interest of highway safety.

d) Wheel washing / mechanical road sweeping.

For the full period of construction facilities shall be available on site for the cleaning of the wheels of vehicles leaving the site and such equipment shall be used as necessary to prevent mud, stones and debris being carried onto the highway. Provision to sweep the surrounding highway network by mechanical means will be available and the roads adjacent to the site shall be mechanically swept as required during the full construction period.

Reason: To prevent stones, mud and debris being carried onto the public highway to the detriment of road safety.

Yours faithfully

Dave Bloomer
