From Bowland Forest Higher Division parish council

Re: planning application no.3/2020/0667

The above parish council would like to comment that there are local concerns about increased traffic on the access road to this property and that the road is untreated in winter. A large number of walkers and families with young children use the road so any increase in traffic will be a safety concern. Also there are concerns about the effect on local wildlife.

Thank you
Rachel Carr
