7. Identification of Tree(s) And Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below: tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
E.g. Oak (T3) - fell because of excessive shedding and low amenity value. Replant with 1 standard ash in the same place.

The Bowland Tree Risk Management Appraisal contains maps identifying the locations of all the trees under review. Furthermore, the trees have been identified and marked with pink paint to avoid any confusion. A separate sheet is attached showing the work recommended which is felling of 20 trees.

7. Identification of Tree(s) And Description of Works continued ...

The Trees identified on your Map/Schedule TPO No. 3 1998 are mainly in the Groups and Woodland section and are marked on the attached map
