## 5. Identification of Tree(s) and Description of Works

- A description of the proposed works.

Where trees are protected by a Tree Preservation Order you must also provide:

- Reasons for the work; and where trees are being felled
- Proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position.

T1- Beech tree- Trimming the top of the tree and thinning out the branches as they are overhanging our house and are nearly touching the house.

T2- Beech tree- Trimming the top of tree and thinning out the branches to allow more light in the house and garden and maintain an appropriate height before they grow too big and would then cause a problem to the house in strong winds.

T3- Beech tree- Trimming the top of tree and thinning out the branches to allow more light in the house and garden and maintain an appropriate height before they grow too big and would then cause a problem to the house in strong winds.

We have had a tree surgeon in and he has recommended this work to maintain the trees.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
