

I am a recently qualified dog groomer and my intention is to eventually open up a dog grooming shop in the local area. At this moment in time my plan is to work from home to build up my customer base before making the step to a high street shop.

I have viewed other planning applications on RVBC for dog groomers working from home in the local area and below is some extra information which may be useful: -

- Waste from bathing the dogs would be collected in a tank and emptied after each groom down the foul water drain.
- The summerhouse is already fitted with Rockwool acoustic insulation in walls & ceiling and insulation board in the floor. Windows & doors are UPVC double glazed.
- The dogs would be supervised at all times and always under control.
- My intention is to groom no more than 3 dogs per day.
- Visits to the address would be by appointments only.
- Customers will be able to park off the road on our driveway.
