I would like to make the following representation in relation to the proposed development at the rear of Inglemead Waddington Road Clitheroe

The high stone wall in Hawthorne Place enclosing Inglemead together with the terrace of Victorian stone houses facing are complementary in their preserved form and surely no part should be tampered with. There can be no justification for a hole in this fine wall when the bottom of the garden of Inglemead already has entrance provision off the side lane. Surely this should I be used rather than a inappropriate Hawthorne place gateway

Incidentally I note there is no detailing of a gateway included in the plans. I wonder why ?
