**PLANNING APPLICATION Ref: 3/2021/0660 - Haweswater Aqueduct Resilience Programme
Proposed Bowland Section (Ribble Valley Borough Council)**

Dear Mr. Macholc

APPLICANT: United Utilities Water Limited

PROPOSED DEVELOPMENT: *Proposed works for and use of replacement section of aqueduct, including earthworks and ancillary infrastructure including: a new valve house building within fenced compound with permanent vehicular access provision. With the installation of a tunnel portal and an open cut connection area within a temporary construction compound, to include site accesses, storage areas, plant and machinery, and drainage infrastructure and a temporary haul route with bridge over the River Hodder. In addition, a temporary haul route with bridge over the River Ribble (as one of two options for vehicular access to the temporary construction compound); a series of local highway works together with a temporary satellite park and ride facility and a vehicle marshalling area.*

DEVELOPMENT LOCATION: *From land near the convergence of the Hornby Road, the Roman Road and Shooters Clough to land west of Newton in Bowland; with highway works at various locations from Pimlico Link Road, Clitheroe to Hallgate Hill, Newton in Bowland, via Chatburn Road, Ribble Lane, Grindleton Road and Slaidburn Road; a haul route from land south of West Bradford Bridge to West Bradford Road, west of Healings Farm, West Bradford; a vehicle marshalling facility on land at the Ribblesdale Cement Works, West Bradford Road, Clitheroe and a park and ride facility at the existing Ribblesdale Cement Works car park to the west of West Bradford Road.*

APPLICATION UPDATES

Introduction

Further to the submission of the above mentioned planning application, which was registered on 05th July 2021, and more recent discussions with Ribble Valley Borough Council, it is considered necessary to make some minor design changes/updates in response to issues raised by members of the public and consultees, other design considerations and receipt of additional information. Consequently certain submitted documents require updating and/or supplementing with additional information (mentioned later in this letter).

Design Changes and Updates

Construction traffic access proposals in the Clitheroe area and nearby villages

Chapter 5 of the Planning Design and Access Statement (June 2021) made reference to two transport route options to serve the Newton-in-Bowland construction compound on the Proposed Bowland (RVBC) Section (further details are provided in Section 3.1 of the accompanying Supplementary Environmental Information Report (SEI). At the time it was confirmed that one of the two options would be selected prior to determination of the Proposed Bowland (RVBC) Section planning application. It is now possible to confirm that Route Option 2 – referred to as the Ribble Crossing – has been adopted in preference to Route Option 1, albeit with a need

to use local roads for a period of approximately nine months to enable construction of the Ribble and Hodder crossings – and hence a ‘hybrid option’. Construction traffic would then be routed along the Ribble Crossing as soon as it is constructed and it should be noted that all construction traffic associated with the tunnel construction works would use the Ribble Crossing.

Removal of road widening proposals in the Clitheroe area and nearby villages

Further to the above, whilst Option 1 is in place, during the 9 month ‘enabling phase’, there would be a very infrequent requirement for HGVs to travel through Chatburn, Grindleton and West Bradford. On this basis, it is proposed that such movements would be managed without the need for the implementation of certain previously identified highway modifications: RW01 to RW07 inclusive, and therefore these are removed from the planning application and this is reflected in the updated Series 12 – Highways Works planning drawings.

Newton-in-Bowland Compound Access track amendment

The June 2021 Planning Application provided details of a temporary access track that would be required to take construction vehicles from the B6478 Hallgate Hill road to the Newton-in-Bowland compound. This access track would cross farmland and would include a temporary bridge over the river Hodder. It has been necessary to realign approximately 400 m of the access track to the north of the River Hodder to minimise severance of farm land and reduce the length of road construction within a groundwater-dependent terrestrial ecosystem (GWDTE) and which has resulted in a slight red-line boundary update to accommodate this realignment.

Planning application boundary amendment north of Newton-in-Bowland Compound

A revision has been made to the planning application boundary for the Bowland Tunnel adjacent to and north of the Newton-in-Bowland Compound. The planning application red-lined boundary has been widened for the below-ground tunnel construction route to enable greater construction flexibility in response to potential future development (unassociated with HARP) at the surface and to manage ground conditions. The broader construction boundary applies over a length of approximately 1,400m. The tunnel bore diameter would however remain the same irrespective of where within the planning application boundary the tunnel is ultimately constructed.

Provision of a temporary bridge at the Newton-in-Bowland compound to mitigate the impact of the works on Gamble Hole Farm Pasture Biological Heritage Site (BHS)

Construction, within the current planning application boundary of the Newton-in-Bowland Compound, of a temporary bridge structure to span over a sensitive wildlife habitat known as Gamble Hole Farm Pasture BHS. The proposed bridge structure would be approximately 39 m in length and 4.5 m in height, with earthworks either side of the structure to link the access track road to the bridge deck.

Newton-in-Bowland Compound updated tree information

Avoidance of some previously affected trees within the Newton-in-Bowland Compound through embedded mitigation proposals (i.e. avoidance through design), and these are reflected on the updated Series 3 - Site Layout Plans.

Changes and Updates to the Planning Application Documentation

The full list of the submitted application documents and drawings is attached in a series of tables to this letter and, where necessary, the updates are highlighted.

In summary however, the updated documents are:

- Certain Planning Drawings (see list attached to this letter)

- The Construction Traffic Management Plan (note: one combined CTMP to supersede the previous two CTMPs)
- Biodiversity Net Gain Strategy (on-site)
- Biodiversity Net Gain Strategy (off-site).

And Addenda are provided for the previously submitted:

- Habitats Regulations Assessment Screening Report
- SSSI Assessment.

In addition, a SEI report has been prepared for the HARP Proposed Bowland Section (relevant to applications to both RVBC and LCC), to consider the effect these changes/updates have on the conclusions of the June 2021 ES and also the availability of further environmental information. The SEI should therefore be read in conjunction with the June 2021 ES and in most instances sections of the ES remain unaltered, and therefore the vast majority of original sections remain valid (see the attached ES table, which highlights the affected ES sections).

The SEI specifically includes 'additional assessment reports' for those topics in which there has been an increase in available baseline data, or a design change necessitating an update to the June 2021 ES (see attached ES table, for further information).

Appendix A2 of the SEI also addresses post submission comments received by Ribble Valley Borough Council from statutory agencies, local authority officers, non-statutory organisations as well as public comments where a response has been provided to the key themes.

Please note that Section 4 of the SEI Report considers the landscape and visual aspects of alternative construction compound locations within the Area of Outstanding Natural Beauty (AONB). This landscape and visual appraisal explains that alternative locations for the Newton-in-Bowland Compound would broadly perform slightly better in landscape terms, due to the local topography, though they would all be characterised by additional construction works (greater than proposed in the planning application) to connect the new works into the existing asset over a longer distance. Therefore, the alternative locations, including the connection works, would result in a greater level of disruption on the landscape and potentially impact on a greater number of visual receptors over and above those described in the June 2021 Environmental Statement. Additionally, bearing in mind that the Haweswater Aqueduct is gravity fed along its entire 110 km length, increasing physical separation between the newly-constructed asset and the connection point places the aqueduct at risk of falling outside gradient parameters which maintain the gravity flow, therefore requiring energy intensive pumps and permanent new structures in the AONB, and hence why the proposed location was chosen. This work complements the Major Development Test Report, which was included in the Planning, Design and Access Statement submitted in June 2021.

General

There is an additional landowning party affected by the redline boundary changes (added and highlighted to an updated Schedule of Owners/Agricultural Tenants and submitted separately). I can confirm that this party has been sent a Notice 1 under the provisions of the Town and Country Planning (Development Management Procedure) (England) Order 2015.

Please note that updates to the application for the HARP Proposed Bowland Section are also being submitted to Lancaster City Council for their corresponding parts of the HARP Proposed Bowland Section.

We will continue to work collaboratively with the Local Planning Authority and other stakeholders during the determination of the application. Should you require anything further at this stage, please do not hesitate to contact me.

Yours sincerely

James Cullen

James Cullen

Principal Environmental Planner,

United Utilities Water Limited

Proposed Bowland Section – Ribble Valley Borough Council Planning Submission Documents and Drawings

1. Schedule of Planning Documents

Document Title	Document Reference	Original June 2021 Revision/Version	Updated February 2022?
Application Form with Land Ownership Details	n/a	n/a	<i>No, but one landowning party who has been served with a notice</i>
