

Planning Statement

For

The erection of a random stone and metal profile sheet storage building

Within the land to the rear of

Pimlico Barn, Gisburn

On behalf of

Mr Rick Wilson

Introduction

This application is for the erection of a storage building within the rear curtilage of Pimlico Barn, Gisburn. This building is to replace a former Duckworth's coach depot that was demolished in the 2000s following a fire, causing the building to fall into a derelict state, causing serious safety breaches for those working in the local proximity.

The proposed building is surrounded by random stone dwellings to the north and east elevations. With a yard area separating the building and Pimlico Barn to the south. The west edge of the site and building is bordered with Mill Lane.

Design

The building has been designed to be building in random stone to a height of 1200mm with green metal sheet cladding above and green metal sheet roofing with a quarter of the roof with roof lights. The stone to be used is in-keeping with the buildings in the proximity, with the cladding similar to the appearance of the Auction Market across the road, and the storage units within the yard to the rear of Pimlico Road. This cladded appearance also echoes the previous Coach depot building on site, whilst upgrading security and safety elements. This is to ensure that the building does not look incongruous with the surrounding buildings and does not spoil the landscape. The building shall sit just back into the site, following the building line from the neighbouring dwelling. Images and plans are appended to this document to demonstrate the history of the site.

Access

The proposed building shall be accessed from the existing vehicular drop curb off Mill Lane. This shall allow for personnel and vehicles to access the building as required.

The space to the front of the building will allow machines to easily manoeuvre to gain access to the building via one of the aluminium roller shutter doors.

Proposed Use

The building shall be proposed as use class B2; Light Industrial. The building shall provide an aesthetically in-keeping, secure, weather tight building to be utilised within the above class use.

Siting

Below is a copy of the Deeds, indicating the site. The blue outline demonstrates the site that will house the proposed development. With the yellow hatched area indicating an area of right of access over the yard area. The red area demonstrates land owned by the applicant, occupied by Pimlico Barn.

(Not to Scale)

Conclusion

Should the application be successful the applicant will be able to replace the former building to the site. This will allow the currently redundant site to be utilised once again as light industrial.
