[REDACTED]

Hi Lesley,

Thanks for your email.

Info as requested.

* From street level – the top of the frame is 2.6m, and the maximum depth of banner is proposed at 1.5m (2.5m * wide), so 1.1m from street level.

The ground where the frame is fixed is 0.7m below street level so the frame from ground level is 3.3m, and the banner would be 1.8m above ground level.

The bike to work banner is just an example of a banner similar to what could be on there. We haven't gone to the expense of getting any banners printed yet until we get permission. The maximum banner will be 2.5m wide by 1.5m deep.

Thanks

Kind regards

Rachel
