Following consultation with members of the parish council a concern has been raised regarding 3/2021/1183 That is that all the hipped parts of the roof have been changed to pitched gable ends. It says in the supporting statement that this is more characteristic with the street scene. This is not the case as all the other properties sit within their own plot, not right to the boundaries at each side like this one is planned to do. It is already a large property with the hipped roof, as the current approved elevations show. To change it to gable ends makes it even more imposing on the neighbouring properties in terms of loss of light and loss of privacy to the neighbouring properties.
