Hi Stuart thanks for your time earlier.

Have attached a couple of the pics but feel free to forward your own as supporting evidence to Mr Hewitt.

As regards description of works:

Intention to fell 1x Sycamore in very poor condition with timber left in-situ.

2nd Sycamore is recommended to remove due to large inclusion on trifurcated stem. Evidence of Armillaria plus visible crown deterioration.

High target area in close proximity of 2nd Sycamore.

Hope this helps somewhat with the application.

Any questions let me know.

Regards
Pete
