

For the attention of Laura Eastwood  
Planning Application No: 3/2022/0217

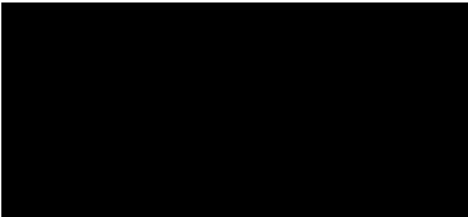

This application relates to part of the Chipping Village Playing Field.

It is not exclusively a football pitch but is available to residents of the village for recreational purposes.

At the time when the field was being changed to two levels the Parish Council, who regulate the field, were asked for, and gave, an assurance that the status of the field for residents use would not be affected by the levelling activity.

It is therefore not appropriate for the proposed boards to be erected as they may interfere with other activities on the field. They would also look out of place in such a rural setting.

There is also a public footpath which goes diagonally across the area.
