Ref planning application No 3/2022/1187

Dear Sir,

I am writing with concern over the access to the proposed application 3/2022/1187

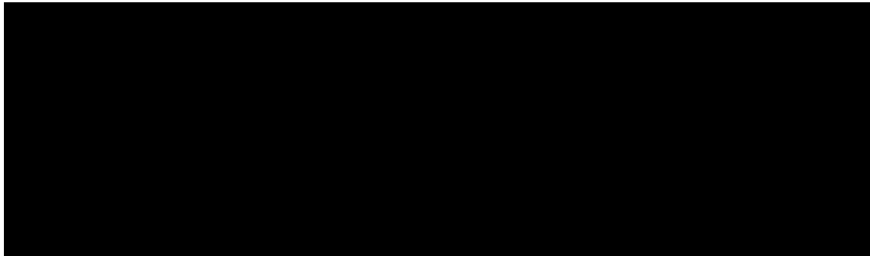

This road [redacted] and [redacted] To service a further three industrial units will create a potential bottle neck on the corner (see drawing).

There is currently a gate by which [redacted] gain access to their property which is locked. Additionally there does not appear to be enough land included in the application to continue the road to access their land.

The existing road is finished to a highway standard [redacted]

Regards
