Good morning

- I wish to object strenuously to the planning applications numbers 3/2023/002
- 3/2023/006
- 3/2023/008.

These applications regard the B.T. hubs proposed for Market Place, Castle Street and King Street.

They are completely out of context to the "historic core" of our market town and promote a jarring effect on our "pleasing historic townscape"

You will notice that I quote from your own area appraisal of 2005 and in which you use the word "historic" no less than 79 times !!!

These modern Tardis effect items are completely foreign to any "historic" town as taken on board already by other ancient towns.

I consider that there are already enough street traffic signs, static advertisements and street furniture for motorists to be aware of - and confused by !! - and a hub with "rolling advertisements" would be just another and dangerous distraction to the said motorists.

Subject: Planning Application Comments - 3/2023/0006 FS-Case-481270537

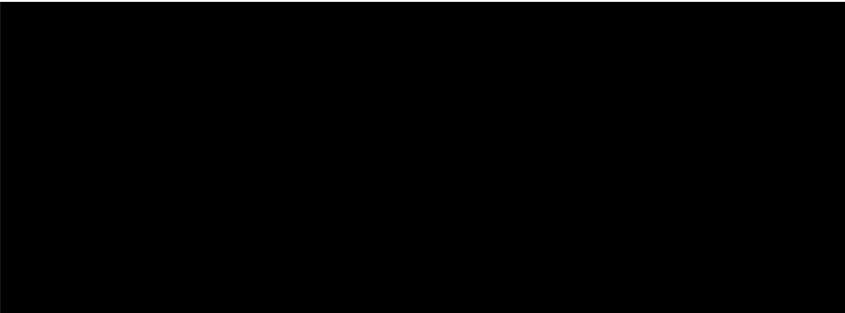

Planning Application Reference No.: 3/2023/0006

Address of Development: Pavement outside 7-9 King Street
Clitheroe BB7 2EU

Comments: A BT board would look unsightly and out of place in Clitheroe. I completely disagree with installing this in a market town which is supposed to be known for its picturesque surroundings. Do not let a large corporate business sway the council into installing something that will fit into our town.

Planning Application Reference No.: 3/2023/0006

Address of Development: Pavement outside 7-9 King Street Clitheroe BB7 2EU

Comments: Ugly, unnecessary and not in keeping with the character and appearance of a rural market town
Would detract from the area in the worst gimmicky, tacky way.

[REDACTED]

Planning Application Reference No.: (3/2023/0006)

Address of Development: Corner of King St & New Market St Clitheroe

Comments: Clitheroe is a small medieval market town on the edge of The Forest of Bowland AONB the proposed development by British Telecom would be completely inappropriate to the nature of the town and be against the guidelines within the conservation area. Also the proposed led screen will cause excessive light pollution in the residential area that the unit is to be sited.
