

I, [REDACTED] of [REDACTED] make this statement in support of an objection against the planning application 3/2023/0141.

I wish to make the objections to the application and I wish to outline my concerns and reasons as follows:-

1. I have visited [REDACTED] on many occasions.

2. I have recently been notified of this application from [REDACTED] together with [REDACTED] family and I wish to object to the application on behalf of them and support their application.

3. Upon reviewing the application I note that there is a bat survey which confirms there is no sign of bats within the area. I vehemently deny this comment as I have been witness since spending time at my friend's property that I have seen bats. In fact myself and [REDACTED] have spent time in [REDACTED] garden watching bats.

4. I also note from the planning application a wind turbine is going to be installed on the "Retained Land". I wish to oppose against this and want my statement to support the objections already submitted.

5. As previously stated above I have spent a lot of time at my friend's house. I have witnessed cows and sheep in the "Retained Land" at the back of the property.

6. On the application submitted it confirms "Is any land to which the application relates part of an Agricultural Holding" and the answer is no. This is in fact correct as I have witnessed cows and sheep in the field where the wind turbine is to be placed. Please see attached exhibits "DO1" , "DO2" and "DO3" of photographs I have taken of cows and sheep in the field in the Retained Land behind where the wind turbine is to be placed.

7. If the wind turbine was to be installed it would encroach on the cows and sheep in the field which have always been there for as long as I have known.

8. If the wind turbine was to be installed it is right behind a lot of houses which would in effect cause a lot of noise and from what I have witnessed the neighbours are all objecting to this application.

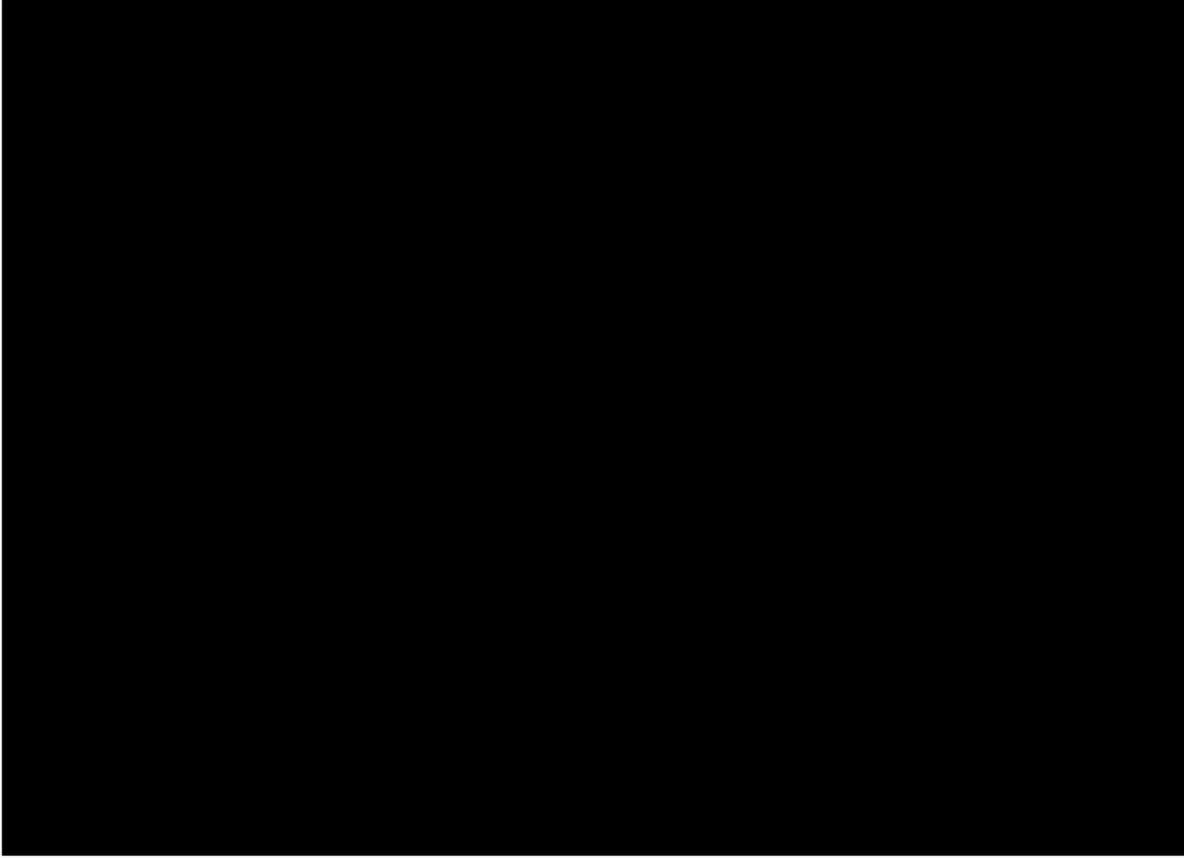

9. I would also like to place on record this application has caused my friends a lot of anxiety. In fact recently [REDACTED] which has resulted in [REDACTED]

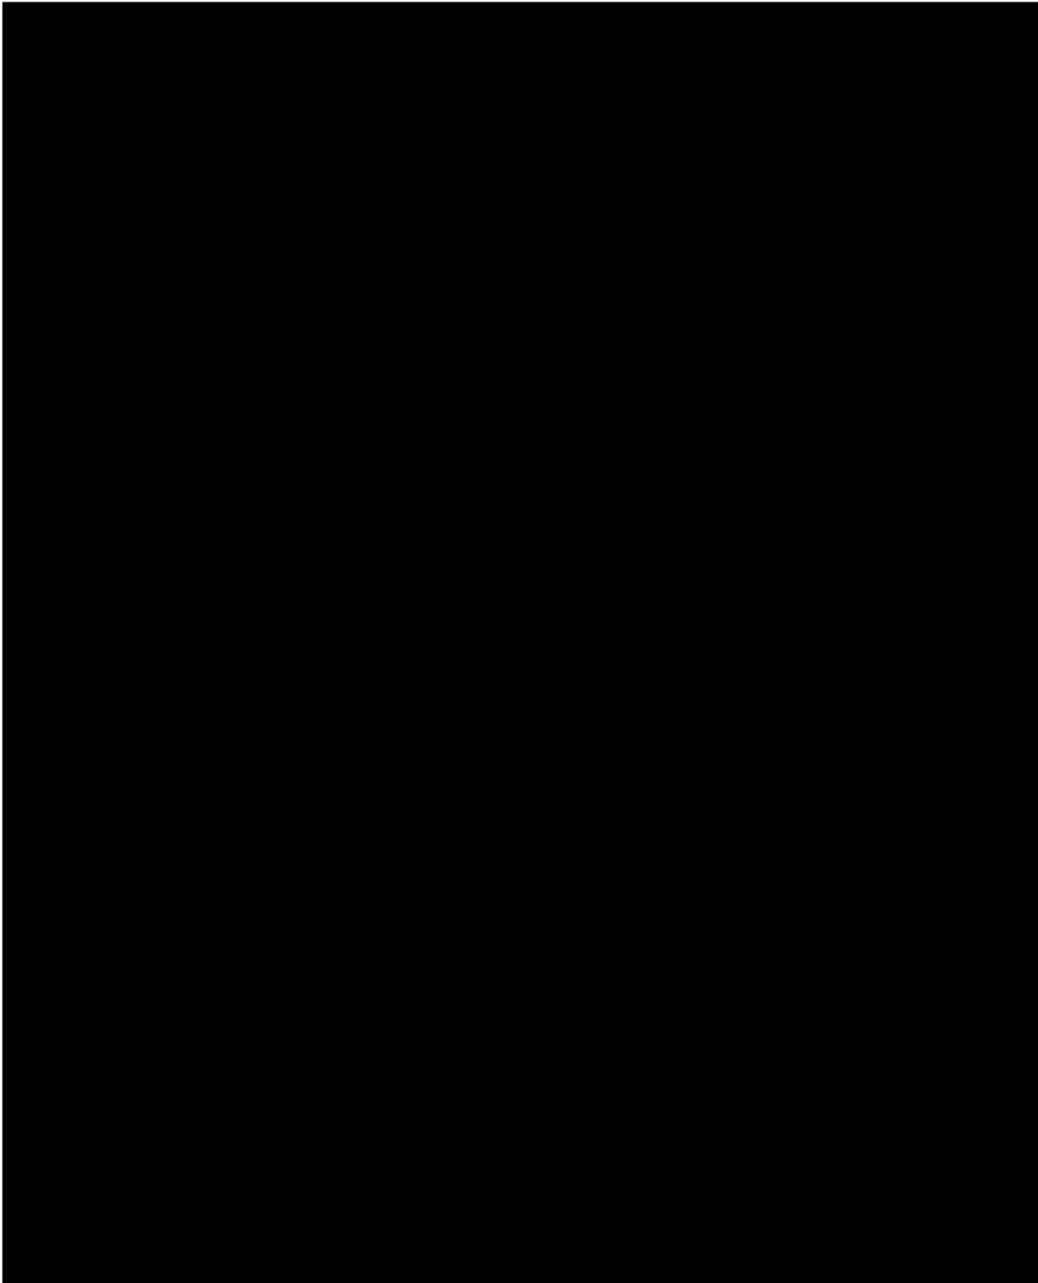

10. I wish that my statement is taken seriously and I wish to oppose this planning application as I believe the contents of the planning application are untruthful especially

in respect of the bats. I would therefore urge you to look into the untruthfulness of the application and oppose such application.
