ATTENTION OF

Dear M/s Hughes,

Re:- Planning Application 3/2023/0165

I strongly object to the above application, because it might result in accidents on the A59 due to fast through traffic inadvertently running into unexpected slow left-turning lorries. At the moment, there are no junctions off the A59 between the two adjacent roundabouts giving a clear stretch of road for around 2 miles.

It is the case that an attenuation pond needs to be built to avoid flooding of the Neddy Lane development, but the pond is only 20m. x about 5m., so surely does not need a new temporary road to remove the small volume of spoil. With a little bit of foresight, the developers could surely move the spoil within the site and up Dale View.
