Condition 22

Species conservation

Schwegler bat boxes (red)

- Positioned on suitable trees - At heights varying 3-6m and facing directing a south, southwest or west
- direction
- To recieve 6-8 hours of sunlight
- Access points clear of obstructions
- If at time of purchase the specified boxes are unavailable then suitable alternatives may be used
- Where there are no suitable trees or access to trees is restricted, then boxes are to be placed on trees within the wider site boundaries.

Schwegler bird boxes (blue)

- to be positioned on suitable trees (i.e. good mature trees with hedge cover nearby to provide a good source of insect food.
- at heights of 1.5m or higher although some species (coal and marsh tits) prefer lower nest sites
- angled so they face away from the prevailing wind (usually south westerly)
- If at the time of purchase the specified boxes are unavailble then suitable alternatives may be used
